It formerly referenced the County code table. This is an optional element so no Wave business rules would apply.</li> <li>Section 6.10 (SchoolInfo/SessionType) – Modified from Mandatory to Optional. The SessionType in the SchoolInfo object is not used. The SessionType used is derived from the TermInfo object related to the CalendarSummary and CalendarDate object.</li> <li>Section 6.11 (SectionInfo/MeetingTime) – Expanded the MeetingTime element and included the TimetableDay and TimetablePeriod elements as Conditional. This is a clarification. The MeetingTimeList was already mandatory and the only elements inside of the MeetingTimeList were TimetableDay and TimetablePeriod. It was expected these would be sent as part of the Mandatory attribute of the MeetingTimeList. This clarifies by including them in the document and marking the Wave Element column to Conditional.</li> </ul>

Version	Date	Modification
1.7	4.1.2015	<ul style="list-style-type: none"> <li>Section 6.11 (SectionInfo/SummerSchool) – Modified from Mandatory to Optional. The Wave does not use this identifier.</li> <li>Section 6.17 (StudentDailyAttendance/SIF ExtendedElement/TransportedEligibleStateAid) – Added a new Student Level element called “TransportedEligibleStateAid” to capture if this instance of Attendance represents a day in which the student was transported eligible for state aid. The data from this additional element was already collected through the StudentAttendanceSummary object. Moving this element to the StudentDailyAttendance will allow for the system to collect and calculate the State Aid days transported in a more efficient manner.</li> <li>Section 6.18 (StudentPersonal/EconomicDisadvantage) – Clarified the definition of EconomicDisadvantage in the Wave Business Rules section to account for the situation where a student DOES NOT have access to a meal.</li> <li>Section 6.18 (StudentPersonal/FreeReduced) – Added a new code to the already existing codeset. The new code “NA” for Not Applicable allows for a district to report the FreeReduced eligibility as Not Applicable per changes made by the United States Department of Agriculture (USDA) where a student without access to a meal cannot be counted for FreeReduced purposes. The lack of a Not Applicable code would keep districts from reporting this element accurately in situations where a student did not have access to a meal.</li> <li>Section 6.18 (StudentPersonal/ProvideToSEAS) – Wave Business Rules will be changing regarding the use of this element. The previous business rules have been removed leaving only the possible code values. A new state special education system contract is in place. This indicator will not be used until the communication between the two systems is defined and it is determined if and when this indicator is needed.</li> <li>Section 6.18 (StudentPersonal/DisabilityCode) – Removed the prefix of “DD” (Developmental Delays) and placed it (Developmental Delays) into the codeset as code 15 (Developmental Delays). This was done to clarify the way in which to report Developmental Delays to the Wave system.</li> <li>Section 6.18 (StudentPersonal/SIF ExtendedElement/MSIArmedForces) – Added a new Student Level collection called MSIArmedForces (Military Student Identifier – Armed Forces). This code identifies whether or not this student has a parent or legal guardian who is a member of the Armed Forces of the United States. This addition is done per HB1331 (Legislative Session 2015).</li> <li>Section 6.18 (StudentPersonal/SIF ExtendedElement/MSIReserve) – Added a new Student Level collection called MSIReserve (Military Student Identifier – Reserve). This code identifies whether or not this student has a parent or legal guardian who is a member of a reserve component of the Armed Forces of the United States. This addition is done per HB1331 (Legislative Session 2015).</li> <li>Section 6.18 (StudentPersonal/SIF ExtendedElement/MSINationalGuard) – Added a new Student Level collection called MSINationalGuard (Military Student Identifier – National Guard). This code identifies whether or not this student has a parent or legal guardian who is a member of the National Guard. This addition is done per HB1331 (Legislative Session 2015).</li> <li>Section 6.22 (TermInfo/MarkingTerm; SchedulingTerm; AttendanceTerm) – Changed from Optional to Mandatory. This is NOT a Student Level collection.</li> <li>Section 7.2 (Basis of Admission Codes) – Codeset modified to add additional codes. Several codes are also indicated as deprecated.</li> <li>Section 7.2.1 (Basis of Admission Reporting Use) – A new section was added to further define and describe the use of the Basis of Admission codes).</li> <li>Section 7.8 (RaceList) – Removed the SDE Code and SDE Description columns leaving only the SIF Code and SIF Description.</li> <li>Section 7.10 (Supplemental nai Language Code) – Additional Native American Indian Language codes added.</li> <li>Section 7.10.1 (Supplemental mis Language Codes) – Additional miscellaneous language codes added.</li> <li>Section 7.31 (Lunch Eligibility Determination) – Further elaborated on definition for code 11.</li> <li>Section 7.32.1 (Testing in Lower Grade) – Provided standardization guidance for multiple assessment formats when providing to the Wave through the StudentAcademicRecord object.</li> <li>Section 7.34 (CalendarDateType Code) – Provided code table and SDE Descriptions. The codeset was already collected. This addition provides and SDE Description for the already existing SIF Code and SIF Description.</li> </ul>

1.8	5/1/2016	<ul style="list-style-type: none"> <li>• Section 6.2 AttendanceCodeInfo Object changed Description from Optional to Mandatory.</li> <li>• Section 6.4 CalendarSummary Object updated business rules to include information for the FQSR/ASR report for description.</li> <li>• Section 6.4 CalendarSummary Object made clarification that SIF_ExtendedElements/SIF_ExtendedElementName="LunchMinSectionutes" should be recorded in minutes</li> <li>• Section 6.11 SectionInfo Object changed SectionRoomList and MeetingTimeList optional.</li> <li>• Section 6.14 StudentAcademicRecord added definitions to MarkValueInfo Percentage, Numeric, Letter, and Narrative.</li> <li>• Section 6.18 StudentPeriodAttendance. This entire object is new.</li> <li>• Section 6.19 StudentPersonal removed 04 –Deafness from the Primary Disability Code options</li> <li>• Section 7.2 added Basis of Admission EntryType Code for LTSS, STSS, FRGN, and ROP</li> <li>• Section 7.2.1 added explanations for the new EntryType Codes and made changes to the Basis of Admission Reporting Use Table</li> <li>• Section 7.10.1 Akan and Liberian English were added to the Supplemental mis Language Code</li> <li>• Section 7.12 deleted explanation 3 under ExitCode 3505</li> <li>• Section 7.34 added clarifying language for CalandarDateType code 9999</li> <li>• Added Appendix A (current validations)</li> <li>• Added Appendix B (new validations)</li> </ul>

## 1 - Introduction

The Oklahoma State Department of Education (SDE) is developing and implementing a comprehensive statewide student record tracking and reporting system. Development and implementation of this system, branded *the Wave*, is a multiyear, phased project that is revolutionizing the manner in which district data is collected, managed, and analyzed by the state and local school districts. In accordance with 70 O.S. § 3-104, state law authorizes the Oklahoma State Board of Education and the Oklahoma State Department of Education to collect data from schools necessary to perform required duties and functions. While the method and efficiency in which data is reported is changing (via *the Wave*), all requirements are unchanged and remain the same by law.

Using *the Wave*, SDE staff will be able to manage data for decision making and statistical reporting at the state level, routinely provide pertinent information to school districts, and satisfy mandated state and federal reporting requirements. Once *the Wave* and its components are in place, the ability of the SDE to address accountability issues, student mobility, longitudinal studies, emerging policy matters, federal reporting mandates, and other related items will be greatly enhanced.

Legislation requires that student information and instructional management systems used within Oklahoma school districts, beginning with the 2005-2006 school year, shall comply with XML standards and SIF specifications. These requirements, when combined with state data collection and submission requirements, define the external requirements districts and schools must address when deciding how to best meet their needs.

This document outlines the collection of student information system (SIS) student demographic and enrollment data from districts after the completion of the “initial assignment” of student testing numbers. Collection of this data will include event-based reporting as well as scheduled (request-based) collections.

### 1.1 - Purpose

The purpose of this document is to provide information necessary for the collection of required student demographic, enrollment, teacher and course data, within *the Wave*. This requirements document is for SIS vendors to use in mapping the elements necessary for data collection. Oklahoma school district personnel must ensure their vendor is provided this documentation and is able to meet the defined data submission requirements. Vendors may utilize this document as a vital starting point for SIF agent development as it clearly identifies Oklahoma’s expectation in regards to the SIF 2.0r1 Implementation Specification. Data objects and elements identified in this document, to be collected through *the Wave*, fall under the same School Laws of Oklahoma as all reports required of school districts in that all persons charged with the collection of data through *the Wave* shall maintain event and scheduled data collections with the highest degree of diligence, accuracy, and good faith in reflecting the truth.

## 1.2 - How to Use this Document

This document provides the necessary requirements for the SIS to properly submit and receive SIF messages to/from *the Wave*. Subsequent sections identify SIF Objects and Elements, SDE business rules, and applicable Code tables. To ensure success with *the Wave*, reference must be made to all three of the above mentioned aspects. If questions or uncertainty regarding specific aspects arise, please contact *the Wave* via the OSF Help Desk at (405) 521-2444 for clarification. A ticket will be opened and a representative will contact you to assist in answering any questions or providing clarification.

This document is to be used in conjunction with the SIF 2.0r1 Implementation Specification. The SIF 2.0r1 Implementation Specification can be obtained by visiting the SIF Web site at <[www.sifassociation.org](http://www.sifassociation.org)>.

## 1.3 - How this Document is Organized

This document is divided into seven sections designed to answer a wide range of questions about operational considerations and technical requirements for implementing the district's interface with *the Wave*.

**Section 1:** Introduction - provides information regarding the document itself.

**Section 2:** Configuration Components - provides information regarding the necessary components for successful connection to *the Wave* and to enable successful submission of required data.

**Section 3:** Student Testing Number Assignment - provides information regarding the assignment of Student Testing Numbers.

**Section 4:** SIF\_Event Processing - provides information regarding event-based SIF objects/elements.

**Section 5:** SIF\_Request Processing - provides information regarding request-based SIF objects/elements.

**Section 6:** SIF Object Mapping - provides information regarding the specific requirements for SIF objects/elements within *the Wave*.

**Section 7:** Code Tables - provides information regarding the acceptable code values for elements identified in Section 6.

## 1.4 - Definitions

This table lists a variety of terms and acronyms used within this document. Since these terms are understood by vendors developing student information packages, they have been listed here in summary as a point of reference.

Term	Brief Description
Event	A change to existing district level data that results in a SIF message being sent to the zone.
HTTPS	Hyper Text Transfer Protocol Secure
Initial Assignment	The one-time process of assigning state-provided student testing numbers to currently enrolled students within a district.
Initial Load	The submission of student data provided by districts for the initial assignment or revalidation of state-provided student testing numbers. The initial load will occur at the beginning of each school year.
SDE	(Oklahoma) State Department of Education
SIF	Schools Interoperability Framework: SIF is an open standard specification to ensure K-12 instructional and administrative software applications share information quickly and efficiently. SIF is platform independent and vendor neutral.
SIF Application Agent	Refers to the part of a SIS or other application that sends/receives data in accordance with SIF specifications.
SIF XSD	Schools Interoperability Framework eXtensible Markup Language Schema Definition/Documentation. Refers to the specification standard that is used by ZIS/SIF Agents to validate data coming from another SIF Agent ensuring it has met the required standard.
SIS	Student Information System: A software program used by a school or district to collect and manage student information. Sometimes referred to as a Student Information Package (SIP).
SSL	Secure Socket Layer: A protocol for transmitting private documents via the Internet.
STN	Student Testing Number: A unique, state-provided number assigned to all students by <i>the Wave</i> .
<i>the Wave</i>	A customized and secure electronic statewide student information system established to benefit districts with federal and state reporting requirements.
XML	eXtensible Markup Language: A flexible way to create information formats and share both the format and the data on the World Wide Web, intranets, and elsewhere.
ZIS	Zone Integration Server: Middleware software designed to manage data routing, data security, and message delivery.

## 2 - Configuration Components

The specific configuration of each district will involve three key components; Student Information Systems (SIS), the Schools Interoperability Framework (SIF) Agent, and District Zone registration.

### 2.1 - Student Information Systems (SIS)

Student Information Systems (SIS) are applications at the district/site level that track data necessary for reporting and accountability purposes. There are numerous vendors, applications, and versions available to Oklahoma districts. The specific selection is determined by the individual needs of each district. These systems must meet three requirements in order to be considered “compliant” with *the Wave*. First, SIS applications must be certified to the identified SIF Implementation Specification, 2.0r1, and submit data in the 2.0r1 format. Second, SIS applications must go through a pilot process for effective message verification with *the Wave*. Third, SIS applications must continue to maintain the standards outlined in this document throughout the school year. Districts unsure about potential SIS vendors can contact *the Wave* office or view the SIF Certification Register by visiting the SIF Web site at <[www.sifassociation.org](http://www.sifassociation.org)>. These three requirements apply to any SIS vendor desiring to do business with districts in Oklahoma. Once a vendor has met the first two steps (SIF Certification and Pilot Process) and has shown compliance throughout a single school year, there will not be a need to meet step two (Pilot Process) again. They must continue to renew their SIF Certification yearly and show continued compliance with the current Wave requirements document and any updates to the documentation.

### 2.2 - Schools Interoperability Framework (SIF) Agent

In order for a district’s SIS application to submit data to *the Wave* there must be a working SIF agent connected to both the SIS application and the State ZIS. Many SIS vendors develop these agents for their application. For SIS applications that do not have the SIF Agent developed, a third party vendor may need to be selected to provide the SIF agent. Regardless of the configuration, the application and the SIF Agent must comply with the current Wave Requirements documentation.

### 2.3 - District Zone Registration

Once a district has an SIS and a working 2.0r1 SIF agent, meeting the requirements identified in 2.2, the district will be ready to register into a specific zone within *the Wave*. The zone information will be made available to district SIF agent vendors as they identify their readiness to connect to *the Wave*.

District SIF agents will register into a zone located at the state. The SDE will provide a single monitored zone for each district. This single zone will be the channel for data transfer to and from *the Wave*. For Student Testing Number assignment, SIS/SIF vendors must be capable of receiving the StudentPersonal object change from the single district zone and populate the STN to the appropriate district or site level application.

For further information regarding this process, please contact *the Wave* office via the OSF Help Desk at (405) 521-2444.

### 3 - Student Testing Number Assignment

The initial assignment of Student Testing Numbers (STN) has been completed. Districts enrolling a new student or a student new to their district will enter the STN assignment process based on four SIF objects. The objects utilized for STN assignment are StudentPersonal, StudentContact, SchoolInfo and StudentSchoolEnrollment. The SchoolInfo object should be received at the beginning of the school year. The remaining three objects will be sent to *the Wave* upon enrollment of the student within the district and will be utilized to determine whether or not the student record is unique or currently exists within the SDE data warehouse. Upon assignment of a STN, *the Wave* will publish a change on the StudentPersonal object. The StudentPersonal/StateProvinceId element will contain the state assigned unique 10-digit identifier or STN. Student Information Systems (SIS) must be capable of receiving the StudentPersonal object change from the single district zone located at the state and populate the STN to the appropriate district or site level application.

### 4 - SIF\_Event Processing

The SIF 2.0r1 Implementation Specification identifies a SIF\_Event as follows:

When an application adds, changes or deletes data represented in one or more Zone Contexts, its Agent should publish the corresponding Add, Change or Delete SIF\_Event to the Zone.

For the objects identified as being event-based, *the Wave* requires SIF\_Event messages be published by the SIF Agent to the ZIS when adds, changes or deletes occur at a minimum daily. These SIF\_Event messages will then update *the Wave*. Refer to the Schools Interoperability Framework Implementation Specification Version 2.0r1 for SIF\_Event object information. Refer to section 6 of this document for specific *Wave* mapping information for each object.

The following SIF Objects are required to have SIF\_Event reporting: AttendanceCodeInfo, CalendarDate, CalendarSummary, DisciplineIncident, LEAInfo, RoomInfo, SchoolCourseInfo, SchoolInfo, SectionInfo, StaffAssignment, StaffPersonal, StudentContact, StudentDailyAttendance, StudentPersonal, StudentSchoolEnrollment, StudentSectionEnrollment, StudentSectionMarks, and TermInfo. For more information and mapping for these objects, refer to section 6 – SIF Object Mapping.

### 5 - SIF\_Request Processing

SIF\_Requests may be issued by *the Wave* for any of the identified objects at any time. The SIS application agent must be able to respond to these requests. If SIF\_Query is not used in the request, *the Wave* will expect to receive all data for the object requested for the current school fiscal year. Data for previous years may be sent as well, but at a minimum the complete current school fiscal year data must be provided. The school fiscal year runs from July 1<sup>st</sup> to June 30<sup>th</sup> of the following year. For example, if *the Wave* requested all StudentPersonal and StudentSchoolEnrollment data, we would expect at minimum to receive data on all students who attended at any point during the fiscal school year. If the request was made in May 2010, students who began attending in August 2009 and exited prior to May 2010 would be in the response along with the students currently attending. Refer to the Schools Interoperability Framework Implementation Specification Version 2.0r1 for SIF\_Request

information. Refer to section 6 of this document for specific *Wave* mapping information for each object.

## 6 - SIF Object Mappings

### The SIF Object Mappings Table Key

The table below identifies the columns being utilized for the SIF Object Mappings tables. Element, Attribute, Char, and SIF Description have been obtained directly from the SIF 2.0r1 Implementation Specification (with the exception of StudentAttendanceSummary, section 6.15) and are reprinted with permission from Schools Interoperability Framework Association. Printed by the State Department of Education as authorized by 70 O.S. § 3-104.

In addition to identifying the object, elements and *Wave* Business Rules, a section entitled “Common Issues” is provided for each object to identify areas where data is commonly invalid or fails to meet the standard for that element as required in the SIF 2.0r1 Specification. It may also contain some “best practices” to use when providing this object/element to the SDE.

Areas shaded in gray indicate a change from *the Wave’s* 2.X Wave Requirements document version 1.4 provided in April of 2012. These may indicate a new requirement, a change in business rules, or further explanation of an object to assist vendors and districts in identifying exactly what is required.

## 6.1 Address

(SIF specification 2.0r1 - 6.2.1)

This element represents an address. This element occurs within objects and elements such as StudentPersonal.

### Common Issues

- StateProvince – The StateProvince is required in the SIF Specification to be two upper case letters from the specified code list.
- Country – The Country is required in the SIF Specification to be two upper case letters from the specified code list or four uppercase letters when the country is the code for a formerly used name of a country as identified in the specific code list for SIF 2.0r1.
- PostalCode – The PostalCode is commonly mistyped by the end user. Validation on this field in the SIS to ensure that 5 or 9 numeric digits are recorded when the Country is US would help to eliminate many of the mistyped PostalCodes.

Element	Attribute	Char	Wave Element	SIF Description	Wave Business Rules
<b>Address</b>					
Type		M	M	Code that defines the location of the address. Note: A subset of specific valid values for each instance in a data object may be listed in that object.	<i>Refer to code table 7.1</i>
Street		M	M	The street element is a complex element and breaks the street down into several parts.

## 6.2 AttendanceCodeInfo Object

(SIF specification 2.0r1 - 6.14.1)

This object provides information about a particular attendance code, allows applications to synchronize each other's attendance code tables, or provides a dynamic list of attendance codes.

### 6.10 SchoolInfo Object

(SIF specification 2.0r1 - 6.14.9)

This object is used to generate the required GUID for the school.

#### Common Issues

- **StateProvinceId** – This must be the county/district/site code of a valid accredited district/site. Districts commonly track students in separate site databases for flexibility in tracking and data security. An example of this would be a district who has only two accredited sites (105, 705), but for tracking purposes, they have a “middle school” (site 505) where they track their 7<sup>th</sup> and 8<sup>th</sup> graders. This fictional site with real students must be reported to us with the correct accredited StateProvinceId of county/district/105. Ideally this will be done with a single SchoolInfo object for both the students in site 105 and the students in site 505, but if necessary, two SchoolInfo objects can be provided, both having the same StateProvinceId. RefId associations with StudentSchoolEnrollment and StudentPersonal would of course be in place to properly identify the SchoolInfo object.
- **NCESId** -- This is commonly not filled in by the district or filled in incorrectly. This information can be found by going to the following link and searching for the district/school: <<http://nces.ed.gov/globallocator/>>
- **GradeLevels** – Only the GradeLevel Codes identified in the SIF 2.0r1 Specification are accepted. Some SIS applications allow districts to create custom grade levels. SIS SIF Agents must ensure these custom grade levels are mapped to an appropriate SIF Code or the object will fail SIF XSD Validation.

<b>StaffAssignment</b>				This object defines information related to a staff member's assignment(s); commonly, this will be a school assignment.	More than one StaffAssignment is expected when a staff member, such as a teacher is assigned or has duties/responsibilities at more than one School Site.
RefId		M	M	The GUID that uniquely identifies a particular staff assignment.	
SchoolInfoRefId		M	M	The ID (GUID) that identifies the school where the staff member is assigned.	Vendors are free presently to take whatever approach best suits the needs of their districts or application with regard to "district only" staff. The use of this object for <i>the Wave</i> is primarily for identifying the StaffAssignment of teachers. <i>The Wave</i> recognizes that not all staff is teachers, but the inclusion of the SchoolInfoRefId mandates that each StaffPersonal be assigned to a particular or multiple Schools.
SchoolYear		M	M	School year for which the information is applicable, expressed as the four-digit year in which the school year ends (e.g., 2007 for the 2006-07 school year).	
StaffPersonalRefId		M	M	ID (GUID) of this staff member, as represented in the StaffPersonal object.	
Description		O	O	Short assignment description	

Element	Attribute	Char	Wave Element	SIF Description	Wave Business Rules
PrimaryAssignment		M	M	Is this the staff member's primary assignment? Note: There must be one and only one instance of the object with a Yes value in this element per school year.	Regarding business logic on this element, <i>the Wave</i> recognizes there may be a short period of time while the end user is modifying the PrimaryAssignment <i>the Wave</i> will receive two PrimaryAssignments with a “Yes” value or potentially zero PrimaryAssignments with a “Yes” value. During that time period, a warning will be displayed for the end user to correct this as soon as possible. If the end user completes their task in a timely manner ensuring in the SIS that only one PrimaryAssignment contains a “Yes” value, and the SIS/SIF Agent sends SIF_Events regarding the changes in a timely manner, the warning should clear from our Web site quickly.
JobStartDate		O	M	This is the date from which the staff assignment is valid (inclusive).	This is the start date for this particular staff member for the current fiscal year. As such, the date must fall within the current fiscal year. For contracted Staff, this will be the beginning of the contract date.
JobEndDate		O	M	This is the date through which the staff assignment is valid (inclusive).	This is the end date for this particular staff member for the current fiscal year. This date will change if the staff member resigns, is terminated, is re-assigned to a different site, or is no longer assigned to this particular site.
JobFTE		O	O	Full-time job equivalent ratio for this assignment. (Format is x.xx; an employee who is full-time and who is 50% of their time on this assignment would be represented as 0.50)

### 6.14 StudentAcademicRecord

(SIF specification 2.0r1 - 6.15.3)

This object conveys a student's academic record data for student record exchange and transcript purposes.

This object is required for all students from PK through Grade 12. Certain elements of the object are conditional and only required for high school Students who have completed at least one hour of high school credit. The main portion of this object needed for students in a grade lower than 9<sup>th</sup> is the AssessmentPerformanceHistory which will provide a means for school districts to transmit data regarding various assessments students have completed. For students in 9<sup>th</sup> through 12<sup>th</sup> grade, more information related to what would normally be found on a high school transcript is expected.

Due to the nature of the data collected in this object, it is required that a SIF\_Response be provided for two fiscal years of StudentAcademicRecord data (i.e. the current fiscal year and the previous fiscal year). It is possible for a student to exit the school before all of the necessary data elements are supplied by the user. As an example, a student may graduate, but their final grades and all associated assessments were not entered until after the district rolled their Student Information System to the next school year. In that instance, the Wave will still be able to request StudentAcademicRecord data from the previous school year at the very least. More than two fiscal years may be available, but at a minimum the current year and previous school year StudentAcademicRecord data must be available for all students who attended the district during those time frames.

### 6.15 StudentAttendanceSummary Object

(SIF specification 2.0r1 - 6.14.13)

This object provides a summary of a student's daily attendance and membership information for a given school during the time period between the StartDate and EndDate, inclusive. As such, there may be multiple instances of this object for a student in a school over the course of a school year.

Note: An additional SIF\_ExtendedElement has been added to include the StudentSchoolEnrollmentRefId. This addition reflects the architecture of the SIF 2.4 Specification without requiring vendors to move to that specification. As such, the SIF Descriptions listed below are from the 2.4 Specification. *The Wave* will expect to receive the StudentAttendanceSummary object as a 2.0r1 object.

This object will be collected primarily two times a year. The first will be upon completion of the first nine week reporting period; the second will be upon completion of the school year. SIF\_Query will be used to submit the request during these two time periods. *The Wave* Web site will be accessible to a district user to input the parameters for the query and request their own data as each district or site may require a different StartDate or EndDate to accurately report their First Quarter and Annual Statistical Report. The SIF\_Query request will utilize either StartDate and EndDate or StartDay and EndDay and may also include a particular SchoolInfoRefId and/or StudentPersonalRefId. **Note: Even though the two main collection periods are the first nine weeks and the end of the school year, it is expected the agent will be able to respond accurately to a SIF\_Query request with different parameters (StartDate, EndDate, StartDay, EndDay, SchoolInfoRefId, and StudentPersonalRefId) throughout the school year and the agent and system will be able to calculate and respond to the request without any need of user intervention at either the application or agent level.**

As an example, the SIF\_Request will contain a value asking for a StartDay  $\geq 1$  and an EndDay  $\leq 45$ . The expected SIF\_Response will contain the membership and attendance for students who were enrolled anytime on or in between the 1st day of instruction and the 45th day of instruction, inclusive.

#### Example 1

Student A has a StudentSchoolEnrollment.EntryDate of August 15, 2011. August 15, 2011 is a Day of Membership.  
Student A has a StudentSchoolEnrollment.ExitDate of August 19, 2011. The week of August 15-19 contained 5 Instructional Days.  
Student A has a StudentSchoolEnrollment.EntryDate of August 23, 2011. August 23, 2011 is a Day of Membership  
Student A has a StudentSchoolEnrollment.ExitDate of August 25, 2011. The week of August 22-26 contains 5 Instructional Days.  
Student A was present on all days enrolled except for August 24, 2011.

A request is issued for StudentAttendanceSummary with StartDay  $\geq 1$  and EndDay  $\leq 10$ . Two responses would be expected:

Response 1 would contain the following:

- StartDate = August 15, 2011
- EndDate = August 19, 2011
- StartDay = 1
- EndDay = 5
- DaysAttended = 5
- DaysInMembership = 5
- UnexcusedAbsences = 0
- ExcusedAbsences = 0
- StudentSchoolEnrollmentRefId = the StudentSchoolEnrollment.RefId from the StudentSchoolEnrollment where the student had an EntryDate of August 15, 2011 and an ExitDate of August 19, 2011.
- Other required elements in the object

Response 2 would contain the following:

- StartDate = August 23, 2011
- EndDate = August 25, 2011
- StartDay = 7
- EndDay = 9
- DaysAttended = 2
- DaysInMembership = 3
- UnexcusedAbsences = 0
- ExcusedAbsences = 1 (Assuming the absence was “Excused”)
- StudentSchoolEnrollmentRefId = the StudentSchoolEnrollment.RefId from the StudentSchoolEnrollment where the student had an EntryDate of August 23, 2011 and an ExitDate of August 25, 2011.
- Other required elements in the object

### Example 2

Student B has a StudentSchoolEnrollment.EntryDate of August 15, 2011. August 15, 2011 is a Day of Membership. Student B does NOT have an ExitDate as the student is still currently enrolled.

The weeks of August 15-19 and August 22-26 contain 5 Instructional Days each.

The week of August 29-September 2 contains 4 Instructional Days. August 29, 2011 is a holiday.

The week of September 5-9 contains 4 Instructional Days. September 5, 2011 is a holiday.

Student B was present on all days enrolled except for August 30, 2011.

A request is issued for StudentAttendanceSummary with StartDay > or = 1 and EndDay < or = 15. One response would be expected:

Response 1 would contain the following:

- StartDate = August 15, 2011
- EndDate = September 6, 2011
- StartDay = 1
- EndDay = 15
- DaysAttended = 14
- DaysInMembership = 15
- UnexcusedAbsences = 0
- ExcusedAbsences = 1 (Assuming the absence was “Excused”)
- StudentSchoolEnrollmentRefId = the StudentSchoolEnrollment.RefId from the StudentSchoolEnrollment where the student had an EntryDate of August 15, 2011 and no exit date.
- Other required elements in the object

### 6.16 StudentContact Object

(SIF specification 2.0r1 - 6.14.14)

This object is used to create the student contact information. It is also used to update the student contact information during data collection.

#### Common Issues

- Relationship – The Relationship code is required to be a four-digit numeric value as identified in the SIF 2.0r1 StudentContact Relationship table. The local code is commonly sent and will cause the object to fail SIF XSD validation. Ensuring that all codes are properly mapped or providing a drop down list of available codes in the SIS can help to correct this issue.

### 6.17 StudentDailyAttendance Object

(SIF specification 2.0r1 - 6.14.15)

This object provides daily attendance information for a particular student in a particular school on a particular date.

Multiple instances of this object can be sent for each student daily. As this is a large number of objects, vendors can elect to send only the instances where the AttendanceCodeInfoRefId represents an AttendanceType other than “Present.” In these instances, the SIF\_Event reporting will only reflect when a student is absent, tardy, etc. They will be assumed *Present* otherwise. Note: If the SIF\_ExtendedElement (InSchoolSuspension) associated with this object indicates a “Yes”, the object MUST be sent regardless of what the AttendanceCodeInfoRefId represents. This will help to control the volume of SIF\_Events locally for a district server. If desired, all SIF\_Events, including “Present” can be sent as well.

It is expected that this data can be retrieved via a SIF\_Request from the state at any time and that the SIF\_Response will be able to include all StudentDailyAttendance records for all students regardless of the AttendanceTypeCode referenced by the AttendanceCodeInfoRefId for the current school year at minimum. The Wave may make a request similar to this on a weekend day when district servers will not be as likely to have the workload a normal week would place on them.

The preferred identifier would be a RefId for a StaffPersonal, StudentContact, or StudentPersonal object. However, the user may not be associated with any of these SIF objects. In that case a unique ID given by the source should be used.	
AuditInfo/CreationDateTime		M	O	The date and time of this attendance record was created.

### 6.19 StudentPersonal Object

(SIF specification 2.0r1 - 6.14.16)

This object is used to assign a Student Testing Number (STN). It is also used to update the existing student information in *the Wave* during data collection.

### Common Issues

- ProjectedGraduationYear and OnTimeGraduationYear – These two elements are required to be four numerical digits to represent a year (i.e. CCYY). *The Wave* commonly receives five numerical digits in these fields causing the object to fail SIF XSD validation. A possible solution is to validate the source of this data in the SIS with a drop down box or text entry validation to ensure the correct four numerical digits are sent.
- SIF\_ExtendedElements (Free Reduced) – We receive many different codes for this element. The only acceptable codes are “Free”, “Reduced”, or “None”, “Provision1”, “Provision2”, “Provision3”, and “Provision4”, “CommunityEligible”.

At the time it is determined the student's graduation year will be different, a SIF_Event Change would be expected when this year is modified in the SIS.</p> <p>Regarding the data entered, the projected graduation year should be the school year (fiscal year) the student graduates.</p> <p>Examples:</p> <ol style="list-style-type: none"> <li>1. ### 6.20 StudentSchoolEnrollment Object

(SIF specification 2.0r1 - 6.14.18)

This object is used to assign ownership of the student record during the Student Testing Number (STN) assignment process. It is also used to update the existing student information in *the Wave* during data collection and reporting.

Multiple StudentSchoolEnrollment objects over the course of a school year are possible depending on certain factors. Where “Requires New SSE” is indicated in *the Wave* Business Rules column below, *the Wave* will expect to see a new StudentSchoolEnrollment object if that element/attribute changes. This would require an exit (StudentSchoolEnrollment change event with an ExitDate) and entry (StudentSchoolEnrollment add event with the new data and EntryDate = ExitDate from previous entry + 1 day) for the student. The EntryDate can NOT equal the ExitDate of the previous StudentSchoolEnrollment for the same student in the same district. The EntryDate must always be at least one calendar day later. The only exception to creating a new StudentSchoolEnrollment object on the fields indicated below with “Requires New SSE” would be in the situation where invalid data is being corrected. Note: If an element is not indicated as requiring a new SSE, but SIF specification require one, a new SSE object should be created.

#### Common Issues

- EntryType/Code and ExitType/Code – These two elements are required to be four numerical digits identified in the SIF 2.0r1 specification. The local code utilized by the districts is commonly sent which will fail the SIF XSD validation.

<b>TermInfo</b>				This object provides information about a term; i.e., a reportable period of time.	
RefId		M	M	The ID (GUID) that uniquely identifies this TermInfo entity.	
SchoolInfoRefId		M	M	The ID (GUID) that identifies the school where the term is used.	
SchoolYear		M	M	School year for which the information is applicable, expressed as the four-digit year in which the school year ends (e.g., 2007 for the 2006-07 school year).	
StartDate		M	M	Starting date of the term.	
EndDate		M	M	Ending date of the term (CCYYMMDD).	
Description		O	M	Text-based description of the term.	The locally defined description of the term. If the term set up is a block term, it is recommended the school include the word "Block" somewhere in the description of the term (e.g. Block 1, Block Two, 3 <sup>rd</sup> quarter block, etc.). Otherwise, the Description can be anything determined by the school.
RelativeDuration		O	O	Portion of the school year represented by this term, expressed in decimal form precise to 4 decimal places (e.g., 0.1333).

## 7 - Code Tables

This section identifies code tables showing how SIF Codes provided by your SIS SIF Agent will be mapped by *the Wave* to acceptable SDE codes. It also provides the expected codes for an element that does not have a standard SIF code. Wherever applicable in the SIF Specification, always use the appropriate SIF code. For elements in Section 6 - SIF Object Mappings that did not include a reference to a table in this section the tables identified in the SIF specification are to be utilized.

### Code Tables Key

This table identifies the columns being utilized for the Code Tables.

**7.2 Basis of Admission (EntryType Code/OtherCode List)**

Note: This element is to be supplied in the StudentSchoolEnrollment.EntryType.OtherCodeList with a Codeset = “StateProvince”

SDE Code	SDE Description
OHP1	Out-of-home placement 1. The student is a resident by virtue of placement or address. Out-of-home placement for students who are not residents of the school district in which they are receiving educational services (1.5 Grade Weight)
OHP2	Out-of-home placement 2. The student is a resident by virtue of placement or address. Out-of-home placement in a ten (10) bed Juvenile Detention Facility (1.8 Grade Weight)
OHP3	Out-of-home placement 3. The student is a resident by virtue of placement or address. Out-of-home placement in an eight (8) bed Juvenile Detention Facility (2.3 Grade Weight)
OHP4	Out-of-home placement 4. The student is a resident by virtue of placement or address. Out-of-home placement in a six (6) bed Juvenile Detention Facility (3.0 Grade Weight)
TU	Tuition student – The student is NOT a resident and is NOT on an Open or Emergency Transfer. The student is paying tuition to attend school here. This is NOT the code that would be used when a contract or “bill back” has been made with another district to provide services. (This student is NOT a virtual student as defined by law)
R	Resident – legal. (This student is NOT a virtual student as defined by law)
OT	Transfer - Open transfer. (This student is NOT a virtual student as defined by law)
ET01	Emergency Transfer, Destruction or partial destruction of a school building. (This student is NOT a virtual student as defined by law)
ET02	Emergency Transfer, Inability to offer the subject a pupil desires to pursue, if the pupil becomes a legal resident of a school district after February 1 of the school year immediately prior to the school year for which the pupil is seeking the transfer. (This student is NOT a virtual student as defined by law)
ET03	Emergency Transfer, Catastrophic medical problem of a student, meaning an acute or chronic serious illness, disease, disorder or injury which has a permanently detrimental effect on the body’s system or renders the risk unusually hazardous. (This student is NOT a virtual student as defined by law)
ET04	Emergency Transfer, Total Failure of Transportation Facilities. (This student is NOT a virtual student as defined by law)
ET05	Emergency Transfer, Concurrence of both the sending and receiving school district. (This student is NOT a virtual student as defined by law)
ET06	Emergency Transfer, Unavailability of a specialized deaf education program for a student who is deaf or hearing impaired. (This student is NOT a virtual student as defined by law)
ET07	Emergency Transfer, Unavailability of remote on-site or Internet-based instruction by course title in the district of residence for a student identified as in need of drop-out recovery or alternative education services, provided such student was enrolled at any time in a public school in this state during the previous three (3) years [70 O.S. § 8-104]. (This student is NOT a virtual student as defined by law)
ET08	Emergency Transfer, when a student has been the victim of harassment, intimidation and bullying as defined in Title 70 O.S. § 24-100.3, upon verification by the Receiving District that the student has been the victim of harassment, intimidation or bullying, and that the Sending District was notified of the incident(s) prior to the filing of the application for transfer. (This student is NOT a virtual student as defined by law)
COOP	Co-op Student. (This student is NOT a virtual student as defined by law)

SDE Code	SDE Description
RVON	Resident student who is attending a virtual online school ON campus (This student IS a virtual student as defined by law)
RVOFF	Resident student who is attending a virtual online school OFF campus (This student IS a virtual student as defined by law)
COOPVON	Co-op student who is attending a virtual online school ON campus (This student IS a virtual student as defined by law)
COOPVOFF	Co-op student who is attending a virtual online school OFF campus (This student IS a virtual student as defined by law)
TUVON	Tuition student who is attending a virtual online school ON campus (This student IS a virtual student as defined by law)
TUVOFF	Tuition student who is attending a virtual online school OFF campus (This student IS a virtual student as defined by law)
CHSP	Charter Sponsor. This student is being reported to the Wave by the school district that is the sponsor district for this student. The purpose of using this Basis of Admission is for tracking purposes only by the sponsoring district. The student is also being reported by the charter directly using a different basis of admission code. Note: This code will result in no conflict of ownership, but students reported with this code will not be counted on any report for funding or other state or federal reporting. The actual charter school should not use this code
IEPSA	IEP Service Agreement. Student who is on an IEP and is NOT the resident of this district, but there is instead an agreement to provide service in place between this district and the resident district of this student. Note: This would NOT be considered an Emergency Transfer.
IEPSAVON	IEP Service Agreement Virtual ON campus. Student who is on an IEP and is NOT the resident of this district, but there is instead an agreement to provide service in place between this district and the resident district of this student and the student is attending a virtual online school ON campus. Note: This would NOT be considered an Emergency Transfer. (This student IS a virtual student as defined by law)
IEPSAVOFF	IEP Service Agreement Virtual OFF campus. Student who is on an IEP and is NOT the resident of this district, but there is instead an agreement to provide service in place between this district and the resident district of this student and the student is attending a virtual online school OFF campus. Note: This would NOT be considered an Emergency Transfer. (This student IS a virtual student as defined by law)
FOY	Finishing Out the Year. This student is no longer a resident of this school district, but was at one point a resident during this school year. This student is NOT on an Open or Emergency transfer. The student is finishing out this school year as allowed by 70 OS 18-111 and written in the Accreditation of Oklahoma Schools 210:10-1-17 Student Residency.
NR	Non-Resident. The student is a Non-Resident and no other Basis of Admission code applies.
OTH	Other. None of the other categories above apply for the reason why this student is attending or is being tracked with an enrollment in the local student information system. Note: This code will result in no conflict of ownership, but students reported with this code will not be counted on any report for funding or other state or federal reporting.
TO	Transportation Only. This student is only tracked because the district will receive transportation only funding for this student. The student is not educated by this district, but they are transported by this district. This student would not appear on any report for this district with the exception of the First Quarter and Annual Statistical Report for the purpose of reporting Transportation only.
RBD	This student attends the School For the Deaf or School for the Blind. This student boards at the School for the Deaf and School for the Blind during the week.
ACEPT	ACE Part time. A student denied a standard diploma by the school district that reenrolls in that same school district on a part-time basis to meet the unfulfilled ACE graduation requirements. This is in accordance with Senate Bill 226 (70 O.S. § 2011). Students can only enroll in courses or periods necessary to meet the graduation requirements. These students should not be included on your First Quarter Statistical (FQSR) or your Annual Statistical Report (ASR). They are reported through the ACE Part Time report.

SDE Code	SDE Description
RBDTD	This student attends the School for the Deaf or School for the Blind. This student is transported daily to and from the School for the Deaf or School for the Blind. Only transportation and special education weights will be counted for this student.
BDR	This code should ONLY be used by the School for the Deaf or School for the Blind in their student information system for the purposes of reporting students to the Wave. This code should NOT be used by other public school districts.
BORDER	This student is a resident of a bordering state. The district will not receive any state aid for membership or attendance for this student and will not receive any state funded weights. This district may receive Federal funding where applicable for the services they provide to the students.
RISP	Resident Student who is being served by the district on an Individualized Service Plan (ISP). The district DOES NOT receive state aid membership, transportation, or attendance funding for this student. (E.g. A student receiving speech services, but attends a private school.)
NRISP	A Non-Resident Student who is being served by a district of which the student is NOT a resident on an Individualized Service Plan (ISP). The district DOES NOT receive state aid membership, transportation, or attendance funding for this student (e.g. A student receiving speech services, who is a resident of another public school district, but attends a private school in this school district.)
LTSS	A student that is on a Long Term Suspension, but the district is still providing services. A long term suspension is defined as more than 10 days suspended.
STSS	A student that is on a short term (less than or equal to ten days) of suspension, but the district is still providing services.
FRGN	A foreign exchange student that is temporarily being educated in the United States and has plans to return to his/her home country.
ROP	Resident other placement is a resident student who is placed in a state juvenile or full-time residential facility within their resident district.  For students who not residents of that district, but are placed in a state juvenile or full-time residential facility, the appropriate OHP basis of admission code should be used.

### 7.2.1 Basis of Admission (EntryType Code/OtherCode List) Reporting Use

The following table provides an indication of how the state will interpret the Basis of Admission code being supplied on an enrollment for a student for the purposes of state reporting. The Basis of Admission code describes the involvement of the school reporting the code and indicates to the state system how to use the data supplied. In some instances, more than one district may send student data to the state on the same student. Some examples would include a student in a cooperative. The resident district will have the student enrolled with a Basis of Admission code of “R” while the cooperative will be tracking courses and period attendance for the student in their own system for the purpose of reporting it back to the resident district. The cooperative district could supply the student to the Wave as well with a Basis of Admission code of COOP. Another example would be two districts that have an IEP Service Agreement in place. The resident district would supply the student with a Basis of Admission code of “R” while the district serving the student may also send data to the Wave as well. The district serving the student on the IEP Service Agreement would supply a Basis of Admission code of IEPSA.

The table below will contain either a Yes or No indicating how the Wave will use the enrollment record for reporting purposes. If further explanation is needed beyond Yes or No, the column will contain the text “Explanation” followed by a number that will correspond to the explanation below the table.

### **Explanation 1 (ACEPT – Membership/Attendance)**

The Basis of Admission Code ACEPT indicates an ACE part time student denied a standard diploma by the school district that re-enrolls in that same school district on a part-time basis to meet the unfulfilled ACE graduation requirements. The district is NOT paid state aid for membership and attendance through the First Quarter Statistical Report (FQSR) or the Annual Statistical Report (ASR) for this student, but can receive funding for this student by completing the ACE Part Time Report indicating the total number of hours the student is enrolled and the length of time.

### **Explanation 2 (BRDR – October 1 Accreditation Count)**

The Basis of Admission Code BRDR indicates a student who is a resident of a bordering state, but who attends school full time in a public district in the state of Oklahoma. This student cannot be funded with any state funding. This student WILL appear on the October 1 Consolidated report for the purpose of the overall enrollment count and for reporting in the following categories: ELL (English Language Learner) and Immigrant. This student will NOT be reported for Gifted Talented or Bilingual Counts. Federal funding and reporting will apply where applicable for this student. The School District will NOT receive state aid weights for these students.

### **Explanation 3 (BRDR – October 1 Special Education Child Count)**

The Basis of Admission Code BRDR indicates a student who is a resident of a bordering state, but who attends school full time in a public district in the state of Oklahoma. This student cannot be funded with any state funding. This student WILL be reported on the Special Education Child Count report if the student is on an IEP and Oklahoma services the IEP. The School District will NOT receive state aid weights for this student.

### **Explanation 4 (LTTS & STSS – State Assessments)**

The Basis of Admission Code LTSS or STSS indicates a student that has been suspended for a given amount of time but the districts are still providing educational services. It is at the districts discretion on whether they include this student for state testing. Some certain students on an Individualized Education Plan (IEP) may have a statement in their IEP to require state testing. These students will NOT be included in the pre-code of testing labels and should be added manually once data is transferred to the state assessment vendor's portal.

**Explanation 5 (FRGN)**

A student that is on being educated in an Oklahoma school district that is in the country on a J-1 Visa and has no tuition restrictions as long as the school district/site is certified through the Student and Exchange Visitor Information System (SEVIS) to count the student for attendance and membership. According to, 70 O.S. § 1-114.1 ***Right to Accept or Reject Exchange Students or Sponsoring Organizations*** *Unless otherwise prohibited by federal law, school districts may: Only have to accept exchange students on J-1 visas, issued pursuant to paragraph (a) (15) (J) of Section 1101 of Title 8 of the United States Code, which hold the sponsoring organization responsible.* If a J-1 Visa student is included in membership and attendance, the student is eligible to count in transportation if legally transported and lives 1.5 miles or further from the school.

**Explanation 6 (ROP- Transportation)**

ROP students can be used in transportation counts only if the district is providing transportation between the school and facility.

## 7.12 Entry and Exit Code Descriptions

Below are the Entry and Exit Codes *the Wave* will receive from your district Student Information System (SIS) whenever a student enters or exits your district and the district end user places the appropriate code. The codes available in your SIS may not be exactly the same as the SIF Code listed below, but the descriptions should be similar. Your SIS Vendor will translate your codes into the SIF Codes below when the data is transmitted to *the Wave*. Be certain your SIS Vendor has at least 20 entry codes and 33 exit codes. This will ensure accurate entry and exit information is provided to *the Wave*. The shaded areas below represent some of the more common codes districts will utilize. It is important to read through the codes and select the most appropriate reason for the student entry or exit.

### Entry Codes

SIF Code	SIF Description - Entry	SDE Description - Entry
1821	Transfer from a public school in the same local education agency	Entry - Student is changing sites in the same district. This can occur during the school year. This code would also be utilized at the beginning of the school year if a student is changing sites (e.g. Student is changing from Junior High to High School).
1822	Transfer from a public school in a different local education agency in the same state	Entry - Student is entering the district, coming from another public district in Oklahoma.
1823	Transfer from a public school in a different state	Entry - Student is entering the district, coming from another public school in a different state.
1824	Transfer from a private, non-religiously-affiliated school in the same local education agency	Entry - Student is entering the district, coming from a non-religious private school located inside the public district's boundaries.
1825	Transfer from a private, non-religiously-affiliated school in a different local education agency in the same state	Entry - Student is entering the district, coming from a non-religious private school located outside of the public district's boundaries in the state of Oklahoma.
1826	Transfer from a private, non-religiously-affiliated school in a different state	Entry - Student is entering the district, coming from a non-religious private school located in a different state.
1827	Transfer from a private, religiously-affiliated school in the same local education agency	Entry - Student is entering the district, coming from a religiously-affiliated private school located inside the public district's boundaries.
1828	Transfer from a private, religiously-affiliated school in a different local education agency in the same state	Entry - Student is entering the district, coming from a religiously-affiliated private school located outside of the public district's boundaries in the state of Oklahoma.
1829	Transfer from a private, religiously-affiliated school in a different state	Entry - Student is entering the district, coming from a religiously-affiliated private school located in a different state.
1830	Transfer from a school outside of the country	Entry - Student is entering the district, coming from a school outside of this country, but has been educated in the United States previously (Note: If the student has not received some form of education in the United States prior to this entry, the appropriate code would be either 1839 or 1840).

<b>SIF Code</b>	<b>SIF Description - Entry</b>	<b>SDE Description - Entry</b>
1831	Transfer from an institution	Entry - Student is entering the district having formerly been educated in an institution other than the following: Charter school, private school, home school, public school.
1832	Transfer from a charter school	Entry - Student is entering the district, coming from a charter school (Note: If the charter school is sponsored by the same district, utilize this code rather than 1821).
1833	Transfer from home schooling	Entry - Student is entering the district, coming from home schooling.
1835	Re-entry from the same school with no interruption of schooling	Entry - Student is re-entering the same district (Note: This is the code for rollover from one year to the next. This is also the code used if a student changes grade levels in the same district but does not change sites. This is also the default code to be used anytime a new entry date is created and none of the other entry reasons are applicable if the student is remaining in the same district and is not changing sites.).
1836	Re-entry after a voluntary withdrawal	Entry - Student is re-enrolled after exiting, but did not attend a different district, private school, charter school, or home schooling. For this entry code to be applicable, an interruption of schooling has to have taken place. Example: The parent/guardian indicates to the district they are leaving. The district drops the student from membership. Later the student returns, but was not schooled anywhere else. This code would be indicated on the enrollment.
1837	Re-entry after an involuntary withdrawal	Entry - Student is re-enrolled after a suspension from the same district.
1838	Original entry into a United States school	Entry - Student is being educated for the first time in the United States. Prior to this entry, the student has had no other form of education (charter school, private school, home school, institution) anywhere in the world. This would primarily be placed on Pre-Kindergarten or Kindergarten students.
1839	Original entry into a United States school from a foreign country with no interruption in schooling	Entry - Student is being educated for the first time in the United States. Prior to this entry, the student has had no other form of education (charter school, private school, home school, institution) in the United States, but has been educated in another country. There has been no interruption of schooling for this student for any reason.
1840	Original entry into a United States school from a foreign country with an interruption in schooling	Entry - Student is being educated for the first time in the United States. Prior to this entry, the student has had no other form of education (charter school, private school, home school, institution) in the United States, but has been educated in another country. There has been an interruption of schooling for this student prior to this entry.
9999	Other	Entry - None of the other Entry Descriptions apply to this student entry.

0609	Center-based instruction	The majority of the classroom time is spent in directed study at various "centers" located in or out of the classroom. The mix between Independent study and Face-to-Face instruction is about 50/50. Students are directed to study various topics on their own or provided with instructions for accomplishing different tasks. If more than 50% of the time is spent in the student hands on with technology, the code of 0603 (Technology-based instruction in the classroom will be used instead of this code).
0610	Independent study	The education the student receives for this class is primarily the result of work conducted by the student alone. There may be a teacher directing the study, but the instruction received the majority of the time is done by the student instructing themselves, usually through reading and research.
0611	Internship	The education the student receives for this class is for the purpose of learning the trade or skill the instructor possesses. The education can be a mix of research and observation.
9999	Other	None of the above definitions apply

### 7.19 Reporting End of Instruction (EOI) Scores

The End of Instruction (EOI) Scores will be reported through the StudentAcademicRecord object (section 6.14) in the AssessmentPerformanceHistory section. Each time a student takes an EOI test and the results are received by the school district, the results will be stored and will be provided through this object to the Wave for students in grades 9 through 12.

The AssessmentPerformanceHistory/Assessment section is a repeatable list which will allow for the reporting of multiple facets of the EOI test. The first data listed below (Performance Level) is required data for each EOI reported. The other two are required if the information is available to the district. In each instance, the Assessment/Name will refer to the standardized code listed in section 7.19.2.

1. Performance Level – sent as the Assessment/TestScore (codes of 1, 2, 3, or 4 which correspond to the proficiency levels described in section 7.19.1 below. When the Performance Level is sent, it will be sent with an Assessment/TestScoreType of 0512 (Achievement/Proficiency Level) – refer to section 7.21 for all of the Assessment/TestScoreType codes.
2. Raw Score – sent as the Assessment/TestScore. This will be the actual raw score achieved by the student on this particular EOI. This will be sent with an Assessment/TestScoreType of 3478 (Raw Score) – refer to section 7.21 for all of the Assessment/TestScoreType codes.
3. Scale Score – sent as the Assessment/TestScore. This will be the actual scale score achieved by the student on this particular EOI. This will be sent with an Assessment/TestScoreType of 3479 (Scale Score) – refer to section 7.21 for all of the Assessment/TestScoreType codes.

Other information related to the EOI may be sent in the repeatable list.

#### 7.19.1 Proficiency Levels

Assessment/TestScore (Proficiency Level)	Proficiency Level Description
1	Unsatisfactory
2	Limited Knowledge
3	Proficient/Satisfactory
4	Advanced

#### 7.19.2 Assessment/Name

When sending the EOI scores, the Assessment/Name must be standardized across the school districts to achieve a level of data integrity. The standardization of the EOI tests is listed below.

EOI Test	Data Element = Assessment/Name
Algebra I	ALG1
Algebra II	ALG2
English II	ENG2

English III	ENG3
Biology I	BIO1
U.S. History	HIST
Geometry	GEOM

## 7.20 Reporting EOI Alternate Fulfillment, Remediation and Refusal

Students can fulfill the EOI testing graduation requirements in ways other than the specific EOI test. The results of other testing and other means of fulfilling the requirements will be reported through the StudentAcademicRecord object (section 6.14) in the AssessmentPerformanceHistory section. While other test results can be reported through the AssessmentPerformanceHistory section, data integrity can only be achieved by standardizing the way certain tests and other means will be reported through this object. This section outlines the codes that will be used and the methodology for reporting those codes for key test results and “other means” outcomes.

For all code determinations, refer to the State Department of Education for current requirements related to scoring that determine whether or not a student has fulfilled the requirement for Proficient or Advanced using the alternate method when a distinction between Proficient or Advanced can be made.

### 7.20.1 EOI Alternate Testing

The following Code table provides a way to standardize the Assessment/Name, the Assessment/SubtestCategory and the Assessment/TestScoreType for many of the common tests student will take. The tests listed below can (depending on the score achieved and in some instances combining with other scores) provide an alternate means for meeting the requirements of the Achieving Classroom Excellence (ACE) graduation standards. Some of these tests contain subtests and have an overall composite score; others may only contain a single type of test. If the Assessment/SubtestCategory is blank, the test either has a composite score which will be sent with no SubtestCategory or it's an all-inclusive test that does not require a subtest (e.g. ACT will have six rows; one for the overall test and five outlining the subtests). If certain types of tests cover a large group of subjects, the Assessment/Name will be the type of test and the SubtestCategory will describe the actual subtest matter (e.g. CLEP which does not contain a composite score of all CLEP tests, but does have a variety of subjects associated with it).

The table below describes how the Assessment/Name, the Assessment/SubtestCategory (if applicable) and the Assessment/TestScoreType should be supplied to maintain data integrity across the state in reporting this information. Other tests not listed here can be reported as determined by the school district and your local student information system vendor.

### 7.20.2 EOI Alternate Other Means

Students who are not able to attain a level of Proficient or Advanced on certain End of Instruction (EOI) tests which are required to fulfill the graduation requirements and who have not obtained proficiency through an alternate test may fulfill the requirements through other means which include a project, extenuating circumstances approved by the state board of education, a modified proficiency score determination by an Individualized Education Plan (IEP) team when a student on an IEP shows improvement, or another SDE approved out-of-state test. Fulfillment by these "other means" will be supplied to the Wave through the StudentAcademicRecord object (section 6.14) in the AssessmentPerformanceHistory section.

The code table below shows the appropriate way to report the way in which the test was fulfilled through other means. It provides a description of the alternate method and the supplies what the Assessment/Name, the Assessment/SubtestCategory and the Assessment/TestScoreType should be when reporting that particular fulfillment method.

Alternate Method	Description	Assessment/Name	Assessment/SubtestCategory	Assessment/TestScoreType	Assessment/TestScore
Project	Results from a student completing an EOI alternative project.	(refer to section 7.19.2) for a list of codes to choose from	(refer to section 7.20.3 for a list of project codes)	0512	Will range from 1 to 4 (refer to section 7.19.1)
Extenuating Circumstance	The State Board of Education has exempted this student from the requirements of this EOI Test base on an extenuating circumstance.	(refer to section 7.19.2) for a list of codes to choose from	EXEMPT	9999	TestScore = Exempt
Modified Proficiency Score	The student has achieved a level of proficiency as determined by the IEP team. Refer to the OSDE for complete requirements for this method of achieving proficiency.	(refer to section 7.19.2) for a list of codes to choose from	MPS	0500	Test Score = Pass
Out of State Test	The student has achieved a level of proficiency on an approved test from another state. Refer to the OSDE for approved out of state tests. Note: When supplying this code, another instance of the AssessmentPerformanceHistory should contain the test results used to fulfill the Out of State Test. Refer to section 7.20.1 for how to supply a test not standardized in this document. The Assessment Date should be the same as the date listed here for this result.	(refer to section 7.19.2) for a list of codes to choose from	OOS	0500	Test Score = Pass

### 7.20.3 EOI Alternative Project Codes

Below is a list of approved projects and the appropriate codes to use when referring to this project as an alternative method for fulfilling the requirements of an End of Instruction (EOI) test. These codes

can be supplied as the Assessment/SubtestCategory if reporting an alternate other means method listed in section 7.20.2.

EOI Test	Project Name	Project Description	Project Code (Assessment/SubtestCategory)
Algebra I	Leaps and Bounds	Design and conduct an investigation in order to determine and explain the relationship between a person's height and their vertical reach when jumping and horizontal leaping ability. This project will require collecting data from at least 30 people.	PA1-001
Algebra I	Gold, Silver, Bronze	Investigate the gains made by women/men in the world of sports. This project will require researching data from websites.	PA1-002
Algebra I	Where the Wind Comes Sweeping Down the Plains	You are working for the Oklahoma Tourism Bureau and are coordinating a trip for some tourists that will incorporate some of Oklahoma's highlights.	PA1-003
Algebra I	Shield Yourself	You are working in a video game design business and need to design an awesome shield for game avatars to equip.	PA1-004
Algebra II	Earth Shattering	Given an earthquake scenario and data, analyze and solve problems that occur as a result of the event. This project will require working with and graphing equations.	PA2-001
Geometry	Creatures, Creatures Everywhere – And Not One That's Normal Size	Create a room for a 4" or 9 cm creature using geometric properties. This project will require building a model or developing a schematic of a room that is proportional to realistic dimensions.	PGE-001
Geometry	Down on the Farm	Design a farm using geometric properties. This project will require a large coordinate grid to draw a two-dimensional representation of the required farm elements.	PGE-002
Biology I	A Seedy Situation	<p>The project is composed of three components. The student will complete all three components and tasks associated with each:</p> <ul style="list-style-type: none"> <li>• Component 1: Conduct an investigation to become familiar with the process of seed germination.</li> <li>• Component 2: Design, conduct, and evaluate an experiment that tests the effect of one identified environmental factor on the growth of plants germinated from the previous investigation.</li> </ul>	PBI-001

#### 7.20.4 Remediation, Remediation Refusal, EOI Retake Refusal

Part of the ACE Requirements is to keep a Demonstration of Mastery Cumulative Record and part of that record is to record the dates a student is offered remediation, whether or not that remediation was refused and EOI Retake dates offered and refused. This will be supplied to the Wave through the StudentAcademicRecord object (section 6.14) in the AssessmentPerformanceHistory section.

The code table below shows the standard way to report remediation, remediation refusal and EOI Retake Refusal.

Description	Assessment/AdministrationDate	Assessment/Name	Assessment/SubtestCategory	Assessment/TestScoreType	Assessment/TestScore
EOI Remediation Offered and Refused	The date the Remediation was refused.	(refer to section 7.19.2) for a list of codes to choose from	REMR	9999	TestScore = NA

EOI Retake Offer Refused	The date the EOI Retake was refused.	(refer to section 7.19.2) for a list of codes to choose from	RETR	9999	TestScore = NA

**7.21 Assessment TestScoreType**

Note: Source of SIF codes is SIF 2.0r1 Specification [6.15.3].

SIF Code	SIF Name	SIF/NCES Description
0144	Letter grade/mark	A letter assigned to a corresponding qualitative value. (e.g., A=Excellent, B=Above Average, C=Average, D=Below Average, and F=Failing). Corresponding numerical ranges may vary for each letter grade.
0490	Age score	A derived score used to express a student's test performance in terms of the developmental-level characteristics of the average individual of a corresponding chronological age. This is used more frequently with intelligence and achievement tests for children of school age or below. Scores can be applied to determine a student's mental age (e.g., the average chronological age of students achieving a specific raw score) or education age (e.g., test performance according to the norm age on any given level).
0491	C-scaled scores	A score expressed in normalized standard score of eleven units.
0492	College Board examination scores	A score developed for use with the College Entrance Examination Board tests and those tests by the Educational Testing Service as the basis for reporting scores on many of its other special program tests. It is similar to other linear standard scores but has a mean of 500 and a standard deviation of 100.
0493	Grade equivalent or grade-level indicator	A derived score expressed as the grade placement of those students for whom a given score was average.
0494	ACT score	A score developed for use with the Iowa Tests of Educational Development, but which is now also used with the American College Testing Program and other tests. This score has a mean of 15 and a standard deviation of five, and scores are based on nationally-representative sample of tenth-and eleventh-grade students.
0497	Normal curve equivalent	A score expressed in a normalized standard score with a mean of 50 and a standard deviation of 21.06. Scores range from 1 through 99 and an equal unit is retained in the scale.
0498	Normalized standard score	A score that resembles standard scores (z-scores) but which is computed like percentile scores.
0499	Number score	A number assigned corresponding to the total assessed quality of student response (e.g., the number of answers a student provides that are correct) or the level of a score using a holistic scoring guide usually used in writing assessments.
0500	Pass-fail	A score used to indicate whether a student passes or fails the assessment.
0502	Percentile rank	A derived score presented in terms of the percentage of students in a specified group who fall below a given score point.
0503	Proficiency level	A standardized qualitative expression used to indicate a student's functional mastery of a specific skill (e.g., novice, apprentice, or master).
0504	Ranking	An expression used to indicate the position of a student relative to other students taking the same assessment (e.g., highest, second next highest, third, and so on). Since the total number of cases limits the rank, the two numbers are often reported together.
0505	Ratio IQ's	A score based on the ratio of mental age to chronological age. The ratio or deviation IQ has a common standard deviation for all ages covered by the test.
0506	Standard age score	A score used in connection with certain Riverside Press tests where the standard age score has mean of 1000 and a standard deviation of 16.
0508	Stanine score	A score expressed in normalized standard of nine units (i.e., 1-9). In a normal distribution, stanines have a mean of 5.0 and a standard deviation of 1.96.

<b>SIF Code</b>	<b>SIF Name</b>	<b>SIF/NCES Description</b>
0509	Sten score	A score expressed in a normalized five units on either side of the mean. In a normal distribution, sten scores have a mean of 5.5 and a standard deviation of 2.0.
0510	T-score	A standard score expressed with a mean of 50 and a standard deviation of 10.
0511	Z-score	A basic standard score expressed with mean of 0 and a standard deviation of 1.0.
0512	Achievement/proficiency level	A score that indicates the student's proficiency in a particular subject matter. Performance is usually described in achievement levels (e.g., a range from "basic" to "advanced").
0513	Mastery level	A score that indicates a student's mastery of a particular subject matter. Performance is usually categorized as "Mastered" or "Not Mastered."
3473	Graduation score	Graduation score
3474	Growth/value-added/indexing	Growth/value-added/indexing
3475	International Baccalaureate score	International Baccalaureate score

**7.22 LanguageType Code**

Note: Source of SIF codes is SIF 2.0r1 Specification [6.2.10-1].

SIF Code	SIF Name	SIF Description
1035	Correspondence Language	The language or dialect to be used when sending written communication (e.g., letters, facsimiles, or electronic mail) to an individual.
1036	Dominant Language	The language or dialect an individual best understands and with which he or she is most comfortable. A person may be dominant in one language in certain situations and other for others.
1037	Home Language	The language or dialect routinely spoken in an individual's home. This language or dialect may or may not be an individual's native language.
1038	Native Language	The language or dialect first learned by an individual or first used by the Parent/Guardian with a child. This term is often referred to as primary language.
1039	Other language proficiency	Any language or dialect, other than the dominant language, in which an individual is proficient.
9999	Other	Other

### 7.29 Financial Literacy Reporting

The Financial Literacy information for a student will be reported using the StudentAcademicRecord object through the AdditionalGraduationRequirementPerformanceHistory elements.

#### 7.29.1 Reporting All Fourteen Areas Separately

Below is the standard for reporting the “Name” and “Method” of the fourteen financial literacy elements when reporting them separately.

Personal Financial Literacy Area of Instruction	Requirement/Name	Requirement/Method (Select One)
Earning an Income	PFL01	<p>There are three ways to report the method individually. Supplying the State Course Code is the preferred standard methodology.</p> <ol style="list-style-type: none"> <li><b>State Course Code:</b> Provide the four-digit state course code in which this area of personal financial literacy was taught.</li> <li><b>Course Name – Not Online:</b> If a state course code cannot be determined for the way in which the student fulfilled this particular level of financial literacy, supply the name of the course the student took to fulfill the requirement with the prefix “Course-“ Example: Course-Math Skills</li> <li><b>CourseName – Online:</b> If a state course code cannot be determined and if the course was taken online, supply the name of the course the student took to fulfill the requirement with the prefix “Online-“ Example: Online-Math Skills</li> </ol>
State and Federal Income Taxes	PFL02

### 7.30 ContactInfo PositionTitle

Note: This element is the ContactInfo/PositionTitle and is supplied in the LEAInfo/LEAContactList and the SchoolInfo/SchoolContactList. This Codeset is NOT a list of the only PositionTitle's that may be sent. This list seeks to represent the standard format for certain position titles. As such, the user should be allowed to enter other Position Titles for other contacts as they choose. When a directory is created using this contact information, this list below will represent the only acceptable PositionTitle codes the SDE will use to represent the key contacts listed below. Example: PositionTitle = Superintendent. This title will represent the District Superintendent for the District. A school district providing a PositionTitle with the text "District Superintendent" and NOT providing a PositionTitle of "Superintendent" will NOT have a superintendent listed in their directory information and will receive a warning that the PositionTitle of "Superintendent" was not provided.

Object	Position Title	SDE Description
LEAInfo	Superintendent	The District Superintendent. Note: Only one Superintendent Contact should be supplied.
LEAInfo	Assistant Superintendent	The Assistant Superintendent. Note: More than one of these may be supplied.
LEAInfo	Interim Superintendent	The Interim Superintendent. Note: Only one Interim Superintendent Contact should be supplied and only if the Superintendent and Acting Superintendent is NOT supplied.
LEAInfo	Acting Superintendent	The Acting Superintendent. Note: Only one Acting Superintendent Contact should be supplied and only if the Superintendent and Interim Superintendent is NOT supplied.
LEAInfo	Board President	The President of the School Board. Note: Only one Board President Contact should be supplied.
LEAInfo	Acting Board President	The Acting President of the School Board. Note: Only one Acting Board President Contact should be supplied and only if the Board President and Interim Board President is NOT supplied.
LEAInfo	Interim Board President	The Interim President of the School Board. Note: Only one Interim Board President Contact should be supplied and only if the Board President and Acting Board President is NOT supplied.
SchoolInfo	Principal	The Principal of the School. Note: Only one Principal Contact should be supplied per SchoolInfo object.
SchoolInfo	Acting Principal	The Acting Principal of the School. Note: Only one Acting Principal Contact should be supplied and only if the Principal and Interim Principal is NOT supplied.
SchoolInfo	Interim Principal	The Interim Principal of the School. Note only one Interim Principal Contact should be supplied and only if the Principal and Acting Principal is NOT supplied.
SchoolInfo	Assistant Principal	The Assistant Principal. Note: More than one of these may be supplied.

**7.31 Lunch Eligibility Determination**

Note: This is an Oklahoma SIF\_ExtendedElement. Use State Department of Education Codes. This element answers the question, “How was this student identified as Free or Reduced?”

<b>SDE Code</b>	<b>SDE Description</b>
01	Identified through Direct Certification - SNAP Only
02	Identified as foster child (not subject to verification) – Foster Child who was directly certified.
03	Identified as foster child (categorically eligible) – Foster Child who was NOT directly certified.
04	Identified through homeless/migrant/runaway liaison list – Directly Certified
05	Identified through income-eligible Head Start
06	Identified through Even Start
07	Identified as residential students in RCCIs
08	Identified as non-applicants approved by local officials
09	Identified based on SNAP/TANF/FDPIR case number submitted on an application (categorically eligible)
10	Identified based on income/household size information submitted on an application (Do not include foster children).
11	Eligible due to Provision 2 or 3 school or Community Eligibility school. Note: Only use this code if the school has no other means for identifying the individual status of the student. If the school continues to conduct processes such as direct certification through SNAP, foster, homeless, etc. to identify individual students, utilize the appropriate codes in this list for how the student would individually qualify separate of being eligible simply by being enrolled in a Provision or Community Eligible school. This code should only be used if no other means of individual identification is available and the school the student attends is a Provision 2, Provision 3, or Community Eligible school.
12	Identified through Direct Certification – TANF Only
13	Identified through Direct Certification – FDPIR Only
14	Identified as Homeless, Migrant, Runaway based on Application (not directly certified)
15	Identified as Directly Certified Other (DO NOT INCLUDE these categories: SNAP, TANF, FDPIR, Foster, Homeless, Migrant, Runaway, Head Start, Even Start)
OT	Identified in some other way other than listed above.
NA	The student is NOT eligible for Free or Reduced lunch

### 7.32 Testing in the Lower Grades

Students in PK through 8<sup>th</sup> grade will take assessments common in the state and nationally. The results of these assessments can be provided through the AssessmentPerformanceHistory object and will allow the State Department of Education and the school district to see a holistic view of the progress and needs of a student. This will especially help to serve the highly mobile students in the state and will allow school districts to see formative and criterion based assessment results on students the day they enter their school district through the Wave.

#### 7.32.1 Testing in the Lower Grades

The following Code table provides a way to standardize the Assessment/Name, the Assessment/SubtestCategory and the Assessment/TestScoreType for many of the common tests student will take. Some of these tests contain subtests and have an overall composite score; others may only contain a single type of test. If the Assessment/SubtestCategory is blank, the test either has a composite score which will be sent with no SubtestCategory or it's an all-inclusive test that does not require a subtest. If certain types of tests cover a large group of subjects, the Assessment/Name will be the type of test and the SubtestCategory will describe the actual subtest matter.

The table below describes how the Assessment/Name, the Assessment/SubtestCategory (if applicable) and the Assessment/TestScoreType should be supplied to maintain data integrity across the state in reporting this information. Other tests not listed here can be reported as determined by the school district and your local student information system vendor.

### 7.32.2 Reporting OCCT Scores

The standard method for reporting Oklahoma Core Curriculum Test (OCCT) Scores is listed below. The Wave contains this information already, but where a match could not be made to a student by using their name and date of birth information, this provides another means for reporting that information to the Wave. If a school district chooses to store OCCT test score information in their Student Information System and make it available to the Wave through the AssessmentPerformanceHistory object, this is the standard format for sending that information up to the Wave

**Assessment/Name** – This should always be the code “OCCT”

**Assessment/SubtestCategory** – This will be one of the following subjects listed below with the grade level of the student. Example: “READ3” would be the third grade reading assessment.

GEOG  
HIST  
MATH  
READ  
SCIE  
SOCS  
WRIT

**Assessment/TestScoreType and Assessment/TestScore** – This will identify the type of test score being sent for the test in question along with the score.

1. Performance Level – sent as the Assessment/TestScore (codes of 1, 2, 3, or 4 which correspond to the proficiency levels described in section 7.19.1. When the Performance Level is sent, it will be sent with an Assessment/TestScoreType of 0512 (Achievement/Proficiency Level) – refer to section 7.21 for all of the Assessment/TestScoreType codes.
2. Raw Score – sent as the Assessment/TestScore. This will be the actual raw score achieved by the student on this particular OCCT. This will be sent with an Assessment/TestScoreType of 3478 (Raw Score) – refer to section 7.21 for all of the Assessment/TestScoreType codes.
3. Scale Score – sent as the Assessment/TestScore. This will be the actual scale score achieved by the student on this particular OCCT. This will be sent with an Assessment/TestScoreType of 3479 (Scale Score) – refer to section 7.21 for all of the Assessment/TestScoreType codes.

### 7.33 Instructional Level

This code answers the question: “What is the general nature and difficulty of the instruction being provided?” If a class can be defined as more than one code (e.g. An Advanced Placement class set up specifically for English Language Learner students) a hierarchy of the choice to select is listed below. If the general nature and difficulty of the instruction is not listed below, either code selection will work.

1. College Level
2. Advanced Placement
3. Honors Level
4. International Baccalaureate

SIF Code	SIF Description	SDE Description
0568	Remedial	The content of this course is used primarily for remediation and is designed for that specific purpose.
0569	Special Education Course	The content of this course is used primarily for special education students and is designed for that specific purpose. If this course will have special education students in it, but the purpose of the course is not specifically for providing instruction at a level designed for special education students, this code will NOT be used.
0570	Basic	Same as General (0571). The content of this course is designed specifically for the general population of students. Either this code or 0571 (General) can be used as the default for most classes the average student will take.
0571	General	Same as Basic (0570). The content of this course is designed specifically for the general population of students. Either this code or 0570 (Basic) can be used as the default for most classes the average student will take.
0572	Honors Level	This is an Honors Level course, but is NOT specifically an Advanced Placement or International Baccalaureate program. This would include a Pre-AP course.
0573	Gifted and talented level	The content of this course is used primarily for instructing Gifted and talented students and is designed for that purpose. If this course will have Gifted and Talented students in it, but the purpose of the course is not specifically for providing Gifted and Talented instruction, this code would NOT be used.
0574	International Baccalaureate program	This course is specifically part of an International Baccalaureate program.
0575	Advanced placement	This course is an Advanced Placement course.
0576	College level	This course is being taught at a college or university. Note: This code should NOT be used for Career Tech courses.
0577	Untracked	Do not use this code.

<b>SIF Code</b>	<b>SIF Description</b>	<b>SDE Description</b>
0578	English Language Learner (ELL)	The content of this specific course is used primarily for instructing English Language Learner (ELL) students and is designed specifically for that purpose. If this course will have English Language Learners in it, but the purpose of the course is not specifically for ELL instruction, this code would NOT be used.
0579	Accepted as a high school equivalent	The course being tracked in the student information system was not taught by the high school specifically, but rather by a different school, educational institution, or by other means and is considered by the school district to be instruction equivalent to what would be found in a general high school course. This code could be used for Career Tech courses unless another code listed in this code list will apply. For example: If a Career Tech course was Advanced Placement, the Advanced Placement code should be used.
9999	Other	None of the other codes apply to the general nature or instructional level of this course. (Note: This may be used if a course must be set up as a schedule filler such as “recess” or “lunch”)

### 7.34 CalendarDateType Code

This code indicates the type of school day. A unique code is supplied with each individual day of a school's calendar year including weekends, holidays, non-school days, etc.

SIF Code	SIF Description	SDE Description
INST	Instructional School Day	This is a day of instruction for students. This day DOES count toward membership and attendance and is included in Full Academic Year calculations.
MKUP	Instructional day that is scheduled solely to make up for emergency days or early dismissal days.	This is a day of instruction for students. This day DOES count toward membership and attendance and is included in Full Academic Year calculations.
0845	Teacher only day - Any planned, non-instructional, whole day(s) when students are not present, for example, in-service, workshops, planning days, parent conferences, etc. and including teacher only days that occur on weekends and those prior to the first day of class or after the last day of class for the school session.	<p>If this code is received, the system will check the CalendarDateType OtherCode provided (see section 6.3 for more information).</p> <p>If the CalendarDateType OtherCode = NA, this day DOES NOT count toward membership or attendance and is NOT included in Full Academic Year calculations.</p> <p>If the CalendarDateType OtherCode = 01 (Professional Day), this day DOES NOT count toward membership or attendance and is NOT included in Full Academic Year calculations.</p> <p>If the CalendarDateType OtherCode = 02 (Parent/Teacher Conference), this day DOES count toward membership and attendance and is included in Full Academic Year calculations.</p>
0846	Holiday - The scheduled absence of both students and staff for any whole weekday within the school session, which is not due to emergency closure of the school/facility.	Holiday. This day DOES NOT count toward membership or attendance and is excluded from Full Academic Year calculations.
0848	Student late arrival/early dismissal - Any part-day of instruction (whether planned or unplanned/emergency) which occurs on a weekday during the school session, and can include the first and/or last days of class (if less than full days).	This is a day of instruction for students. This day DOES count toward membership and attendance and is included in Full Academic Year calculations.
0849	Emergency day - Any whole weekday(s) on which the facility/school was closed due to emergency (e.g., tornado, snow, excessive illnesses). Emergency days may be any weekday(s) between, but not including, the last and first days of class for the school session.	This is NOT a day of instruction for students. This day DOES NOT count toward membership or attendance and is NOT included in Full Academic Year calculations.
3421	Strike	This day does NOT count toward membership or attendance and is excluded from Full Academic Year calculations.
9999	Other	The above codes do not apply. This day DOES NOT count toward membership or attendance and is NOT included in Full Academic Year calculations. <b>This code should only be utilized for weekends</b>

		or for dates outside of the first and last days of instruction.

## Appendix A: Current Data Validations

Error Number	Object	Category	Error Short Description	Validation Level	Friendly Error Description
900310001	CalendarSummary	Numeric Check	DaysInSession is out of range.	Low	The Days In Session describes the total number of school days for this calendar. This warning is because that total number of days is either 1. Larger or smaller than is expected for the total number of school days or 2. The total days listed here will not fit inside of the First Instruction Date and Last Instruction Date. Please correct the Days In Session to be the total school days for this calendar OR correct the First and Last Instruction Dates to increase the range.
900310002	CalendarSummary	Numeric Check	DaysInSession was not provided.	Low	The Days In Session describes the total number of school days for this calendar. Please provide the Days In Session by entering this information on the Calendar in your local student information system.
900310003	CalendarSummary	Date Check	EndDate is out of range.	Low	This warning is because an end date for this calendar falls outside of the normal fiscal year. The normal fiscal year runs from July 1 to June 30. The year supplied causes this end date to be out of the range of that normal year. There is another element supplied with the Calendar Summary that shows the School Year. When you receive this warning it is because the school year is the current school year, but the End Date falls outside of that fiscal year range for the school year supplied. Check the Calendar and make sure that the Start and End Dates fall inside the fiscal year.
900310004	CalendarSummary	Date Check	EndDate was not provided.	Low	The End Date for this calendar was not provided. The Calendar contains two ""ending"" dates. The End Date and the Last Instruction Date. The End Date typically falls after the last day of instruction to account for other days that may exist in the calendar after school actually ends such as professional days. Any day you would keep track of on the Calendar

					would fall between the Start and End date of the calendar. In this particular instance, the End Date was not provided. Please provide an end date for this calendar in your local student information system. This is not a common error. You may want to work with your local student information system vendor to see why this element is not being sent or how to properly correct this issue
900310005	CalendarSummary	Date Check	FirstInstructionDate is out of range.	Low	This warning is because the first day of instruction date for this calendar falls outside of the normal fiscal year. The normal fiscal year runs from July 1 to June 30. The year supplied causes this first instruction date to be out of the range of that normal year. There is another element supplied with the Calendar Summary that shows the School Year. When you receive this warning it is because the school year is the current school year, but the First Instruction Date falls outside of that fiscal year range for the school year supplied. Check the Calendar and make sure that the First Instruction and Last Instruction Dates fall inside the fiscal year.
900310006	CalendarSummary	Date Check	FirstInstructionDate was not provided.	Low	The First Instruction Date is the first day of school. This element was not provided. Please make sure the First Day of Instruction is on the calendar in your local student information system.
900310007	CalendarSummary	Code Set	GradeLevel_Code is invalid.	Normal	GradeLevel_Code is invalid.
900310008	CalendarSummary	Code Set	GradeLevel_Code was not provided.	Normal	The Grade Levels associated with this Calendar were not provided. This is not a common warning. Please work with your local student information system vendor to determine why the grade levels associated with this calendar are not being sent.
900310009	CalendarSummary	Date Check	GraduationDate is out of range.	Normal	GraduationDate is out of range.
900310010	CalendarSummary	Numeric Check	InstructionalMinutes is invalid.	Low	The Instructional Minutes is the total number of instructional minutes for this calendar for the entire school year. As an example, if you were in session for 300 instructional minutes each day for 180 days, your

Error Number	Object	Category	Error Short Description	Validation Level	Friendly Error Description
					Instructional Minutes value would be 54000 ( $300 \times 180 = 54000$ ). This is commonly keyed in as the instructional minutes for one day rather than the instructional minutes for the entire school year. Please correct the Instructional Minutes for this calendar in your local student information system.
900310011	CalendarSummary	Numeric Check	InstructionalMinutes was not provided.	Low	The Instructional Minutes is the total number of instructional minutes for this calendar for the entire school year. As an example, if you were in session for 300 instructional minutes each day for 180 days, your Instructional Minutes value would be 54000 ( $300 \times 180 = 54000$ ). This element has not been provided. Please enter the Instructional Minutes for this calendar in your local student information system.
900310012	CalendarSummary	Date Check	LastInstructionDate is out of range.	Low	This warning is because the last day of instruction date for this calendar falls outside of the normal fiscal year. The normal fiscal year runs from July 1 to June 30. The year supplied causes this last instruction date to be out of the range of that normal year. There is another element supplied with the Calendar Summary that shows the School Year. When you receive this warning it is because the school year is the current school year, but the Last Instruction Date falls outside of that fiscal year range for the school year supplied. Check the Calendar and make sure that the First Instruction and Last Instruction Dates fall inside the fiscal year.
900310013	CalendarSummary	Date Check	LastInstructionDate was not provided.	Low	The Last Instruction Date is the last day of school. This element was not provided. Please make sure the Last Day of Instruction is on the calendar in your local student information system.
900310014	CalendarSummary	Field Quality	LocalId was not provided.	Normal	LocalId was not provided.
900310015	CalendarSummary	Numeric Check	MinutesPerDay is invalid.	Low	The Minutes Per Day is the number of minutes in the day in which the school is normally in session. The Minutes Per Day must be at least 150 which is typical for a Pre-Kindergarten Half Day Calendar, but is normally higher than that for an average school day.

Error Number	Object	Category	Error Short Description	Validation Level	Friendly Error Description
					You are receiving this warning because your minutes per day is lower than 150. Please correct by entering the correct minutes per day for this calendar in your local student information system.
900310016	CalendarSummary	Numeric Check	MinutesPerDay was not provided.	Low	The Minutes Per Day is the number of minutes in the day in which the school is normally in session. The Minutes Per Day must be at least 150 which is typical for a Pre-Kindergarten Half Day Calendar, but is normally higher than that for an average school day. You are receiving this warning because your minutes per day for this Calendar has not been provided. Please enter the correct minutes per day for this calendar in your local student information system.
900310017	CalendarSummary	Numeric Check	SchoolYear is invalid.	Normal	SchoolYear is invalid.
900310018	CalendarSummary	Numeric Check	SchoolYear was not provided.	Low	SchoolYear was not provided.
900310019	CalendarSummary	Numeric Check	SIF_ExtendedElement (LunchMinutes) was not provided.	Low	This warning refers to the Lunch Minutes. This is the number of minutes designated for lunch for this calendar. Please provide the lunch minutes by entering that data into your local student information system for this calendar.
900310020	CalendarSummary	Date Check	StartDate is out of range.	Low	This warning is because a start date for this calendar falls outside of the normal fiscal year. The normal fiscal year runs from July 1 to June 30. The year supplied causes this start date to be out of the range of that normal year. There is another element supplied with the Calendar Summary that shows the School Year. When you receive this warning it is because the school year is the current school year, but the Start Date falls outside of that fiscal year range for the school year supplied. Check the Calendar and make sure that the Start and End Dates fall inside the fiscal year.

Error Number	Object	Category	Error Short Description	Validation Level	Friendly Error Description
900310021	CalendarSummary	Date Check	StartDate was not provided.	Low	The Start Date for this calendar was not provided. The Calendar contains two ""beginning"" dates. The Start Date and the First Instruction Date. The Start Date typically falls earlier than the first day of instruction to account for other days that may exist in the calendar before school actually begins such as professional days. Any day you would keep track of on the Calendar would fall between the Start and End date of the calendar. In this particular instance, the Start Date was not provided. Please provide a start date for this calendar in your local student information system. This is not a common error. You may want to work with your local student information system vendor to see why this element is not being sent or how to properly correct this issue.
900310022	CalendarSummary	Date Check	SIF_ExtendedElement FirstNineWeeks date was not provided.	Normal	The SIF_ExtendedElement FirstNineWeeks was not provided to the Wave by your local Student Information System (SIS). The SIF_ExtendedElement FirstNineWeeks is a date provided by your Student Information System for this calendar. This date informs the Wave of when your first nine weeks will end. This date should include the last day of the first nine weeks. This will be used to calculate your First Quarter Statistical Report. The Wave will utilize the first day of instruction and this date to determine the range of the first quarter for this calendar. It is possible for more than one calendar to exist for a school so the data may be different for different calendars if they do not start/end on the same day of the year. Determine the location in your SIS for where to indicate the end of the first nine weeks and record that in your local SIS.

Error Number	Object	Category	Error Short Description	Validation Level	Friendly Error Description
900310023	CalendarSummary	Date Check	SIF_ExtendedElement FirstNineWeeks date is invalid.	Normal	The SIF_ExtendedElement FirstNineWeeks is a date provided by your Student Information System for this calendar. This date informs the Wave of when your first nine weeks will end. This date should include the last day of the first nine weeks. This will be used to calculate your First Quarter Statistical Report. The date you are providing is invalid. There are a few reasons why it may be invalid. 1. It does not fall within this calendar year. 2. It is too far into the future to be a legitimate end of the first nine weeks' date. 3. It is too early to be the end of the first nine weeks. Note: We use the FirstDayOfInstruction that is also provided to help us determine the validity of this date. It is possible the FirstNineWeeks date may be correct, but your FirstDayOfInstruction is incorrect. To review the dates provided, click the "View SIF XML" link to the right of the error to see the dates provided.
900310024	CalendarSummary	Record Check	CalendarDate objects have not been supplied for this CalendarSummary.	Normal	The CalendarSummary provides information about the calendar or calendars for a particular school. When a student is enrolled, that enrollment is associated with a calendar. This calendar information informs your system and the Wave system regarding the first day of instruction, when the end of the first nine weeks occurs, which days are holidays or instructional days, etc. The CalendarSummary provides just summary information. There is another object called CalendarDate which provides each individual date in the calendar from the first day to the last day. Each day is specifically recorded as a holiday, an instructional day, a parent teacher conference day, etc. You are receiving this warning message because the Wave received the CalendarSummary information giving the Start and End Date's, but did not receive any CalendarDate objects related to this summary. The specific details of each individual day are missing. Work with your

					Student Information System provider to make sure the CalendarDate object is being sent and/or to see how to set up each individual day in a Calendar.
900510007	LEAInfo	Code Set	GradeLevel_Code is invalid.	Normal	GradeLevel_Code is invalid.
900510022	LEAInfo	Control Set	County/DistrictCode/ZoneTag mismatch.	Normal	The County/District Code you provided for your District (LEA) does not match the Accredited County/District Code assigned to your LEA. Example: Oklahoma City should have a StateProvinceId of 55I089. The County = 55, The District = I089. Inside of your local student information system, find the location where you input the County/District code for you district and change it to the correct county/district code assigned by the SDE Accreditation Office. It should not contain any spaces or special characters.
900510024	LEAInfo	Control Set	StateProvinceId is invalid.	Normal	The StateProvinceId for the LEAInfo is the concatenation of the County Code and the District Code (e.g. 55I089; County = 55, District = I089). This is not a common issue. Please work with your student information system vendor to send this element correctly to the state. It is possible it was keyed in incorrectly in your local system. Your vendor will be able to assist you in how to correct this element.
900710017	SchoolCourseInfo	Numeric Check	SchoolYear is invalid.	Normal	SchoolYear is invalid.
900710025	SchoolCourseInfo	Field Quality	CoreAcademicCourse was not provided.	Normal	The CoreAcademicCourse indicator describes whether or not this course meets the state definition of a core academic course. Please enter this in your local student information system for this course.

900810038	SchoolInfo	Control Set	StateProvinceId field is invalid.	Critical	The StateProvinceId field on the SchoolInfo object is the concatenation of the county, district, and site code (e.g. 55I089105 would refer to County (55), Oklahoma City Public Schools (I089), Elementary School (105)). This is not a common error. Students are sent to the Wave and are associated to the proper accredited site using this element. If this element is not the code of an accredited school, the students associated with this school will not appear on any report. Here are some of the common reasons why an Invalid StateProvinceId would be sent. 1. The information was keyed in incorrectly. Please make certain the information was typed in correctly in your system. 2. This particular school is an alternative education school where alt ed students are tracked separate of other students. That is not a problem, but the way in which they are being reported to the Wave is an issue. There are multiple ways this can be corrected, but each way is specific to how your student information system vendor handles reporting this element to the Wave. It may be as simple as changing the code to the correct code for this school. It may be that you have to map or bold this site to its accredited site. Or there may be another method for reporting this correctly. In this instance, the best solution would be to determine who the students are attending this school and what accredited site they should be reported through, then contact your student information system vendor to see how that can be done correctly.

901010048	StaffPersonal	Field Quality	First Name invalid for this certificate.	High	The Wave system compares the First Name, Last Name and Teaching Certificate Number supplied by your local student information system against the same fields in the Oklahoma Educators Credentialing System (OECS). In this case, the First Name supplied from your local system does not match the First Name in the OECS system for that teaching certificate number. This can be corrected in one of three ways. 1. Check that the certificate number you have entered is correct for this teacher. 2. Correct the first name in your local system to match the first name in the OECS system. 3. Have the teacher log in to the OECS system and correct their first name to match what is in the local student information system at your district (Note: If the teacher elects to change their name in the OECS system, they are NOT required to purchase a new teaching certificate).

901610089	StudentPersonal	Code Set	EnglishProficiency/OtherCode is invalid.	High	The English Proficiency and English Proficiency Other Code identifies information about students who are both ELL (English Language Learners/Limited English Proficient) and Bilingual as well as Native English Speakers. The warning you are receiving indicates the English Proficiency Other Code is invalid for this student. There are two possibilities. 1. The Code provide doesn't align properly with the English Proficiency Code provided. For instance, if you supply an English Proficiency Code of 1636 (Redisgnated as fluent English Proficient), a code of 01, 02, 03, 04, 05, or 06 should be supplied as the English Proficiency Other Code. If the English Proficiency Other Code supplied was "NA" it would be flagged as invalid. To view the Codes supplied, click the "SIF XML" link. To view a complete list of codes and descriptions, review the document titled "English Proficiency Codes" located in the "Documents" section under the "Resources" tab on the Wave Web site. 2. The code supplied is not a valid code. If you have the ability to hand key enter the codes in your local student information system, correct the codes using the document above. If you do

					not have the ability to enter the codes and an invalid code was sent, you will need to contact your local student information system vendor to have the codes sent correctly.
901610090	StudentPersonal	Code Set	EnglishProficiency_Code is invalid.	High	The English Proficiency Code supplied for this student is invalid. It is invalid because it does not align with the ELL (English Language Learner/Limited English Proficient) indicator supplied for this student. Example: If the ELL supplied = Yes, the EnglishProficiency Code should be 2349 (Limited English Proficient/English Language Learner). If the ELL supplied = No, the English Proficiency Code should NOT be 2349. To correct, input the correct English Proficiency Code for this student or correct the ELL indicator supplied in your local student information system. To view the codes supplied, click the "SIF XML" link and find "ELL" and "EnglishProficiency Code."
901610091	StudentPersonal	Field Quality	EnglishProficiency_Code was not provided.	High	A code indicating the EnglishProficiency of a student was not provided for this student. 901610096	StudentPersonal	Date Check	GraduationDate is invalid.	Normal	The Graduation Date supplied is invalid. There are several factors weighed when determining whether or not the graduation date is valid and whether or not the school should be supplying the graduation date. Reasons why Graduation Date would be considered invalid: 1. The ProjectedGraduationYear supplied is in the future. If the student is projected to graduate in a future year, they should not have a graduation date for the current year. 2. The student has exited your district and the exit code supplied does not indicate graduated or suspension. If the student is suspended, they could still receive services and graduate. If the exit code indicates graduated, then there would not be an issue. The exit code supplied by your system however, indicates the student has left your school to attend another district or other form of education. This would indicate they could not graduate from your school making the graduation date invalid. 3. The Graduation Date supplied is in too far into the future. It is predictive rather than a certainty. (Example: A student with a graduation date of May

901610114	StudentPersonal	Rule Check	OnTimeGraduationYear was not provided.	Normal	The On Time Graduation Year was not supplied. This is the year the student would graduate if they graduate on time. This year should be established the first time student enters ninth grade and should not change after that. In your local student information system, provide the On Time Graduation Year for this student.
901610115	StudentPersonal	Rule Check	ProjectedGraduationYear is invalid.	Normal	The Projected Graduation Year supplied for this student is invalid. There are a number of reasons why this year is invalid: 1. The year is in the past and the student is currently attending. The projected graduation year should be the currently projected graduation year. If the student has not graduated, the year cannot be historical. 2. The Projected Graduation Year is too far into the future. If the projected graduation year is greater than what would be considered normal for a student of that age to graduate (e.g. 50 years into the future), the warning is given. To correct, determine when the student is expected to graduate and enter that year into your local student information system. To view the Projected Graduation Year supplied, click the "SIF XML" link and find "ProjectedGraduationYear."

At that point this code should reference the amount of time it took the student to graduate. Or the exit refers to end of the school year. Refer to Section 7.15 in the 2.x Wave Requirements document for the full list of codes and descriptions. Since this code is listed as "not provided", it is likely you will need to contact your student information system vendor for assistance in correcting how this code is being sent.

Normal	The School Of Membership code is the concatenation of the county, district, site code where this student's membership should be recorded for funding purposes. This warning indicates that the School of Membership being supplied has code that does not reference a valid accredited county/district/site code. This element is new and as such is not used in any reporting at this time. The warnings are displayed to help districts correct these issues before this element is used. In the future when the Wave begins to pre-populate the First Quarter Statistical and Annual Statistical Report, this element will be used to help identify where state aid will be supplied. How this element works: Almost all students are reported to the Wave associated with their accredited school. The school the student is enrolled in is the accredited school the student will be reported through. As such, this "School of Membership" code will be exactly the same as the school the student is enrolled in for most students. The exception occurs when a student is attending a school, but that school is not the one that will claim their membership and attendance. In that instance, the School of Membership Code would reference another school in the district or possibly

Here is an example of how this code may be utilized in the future: A special education student being served through an IEP service agreement. District A is responsible for the Student and receives the membership and attendance state aid for this student. District B is the school that is educating the student. So the student is located inside of District B's student information system. It is completely acceptable for both District A and District B to report this student to the Wave through their local student information system as long as the EntryType/Other Code (Basis of Admission) codes are correct. In this instance District A would have a Basis of Admission code of R-Resident. District B would have a Basis of Admission code of IEPSA - IEP Service Agreement. But what happens if District A does not have the student recorded in their local student information system and only District B is reporting the student to the Wave. The Wave would see the Basis of Admission code of IEPSA and would know that the membership and attendance reported does not belong to District B, but would not know which district to apply that membership and attendance to. The School Of Membership code would provide that resource. District B would supply District A/School A in the School Of Membership Code. The Wave would apply that membership and attendance to District A providing the opportunity for them to review and accept that membership and attendance as accurate.</p>

Message	ExitType/OtherCode is invalid.
Help Description	The ExitType/OtherCode further describes the exit of a student. Typically, this code will be NA (Not Applicable) for almost all students which can be the default code for any exit. There are times when other possible codes will apply. These are graduated students, end of school year exits, and if the student dies or is permanently incapacitated. If your student exits and the reason for the exit is graduated, we must receive a code (HS2, HS3, HS4, HS5, HS6) indicating the number of years it took for the student to complete High School. HS2

	refers to 2 or less years. HS6 refers to 6 or more years. If your system supplies an exit code of 1923 indicating a student who has died or who is permanently incapacitated, an extra code is required to differentiate between the two. The ExitType_OtherCode in this situation must be either 1923D indicating the student has died or 1923P indicating the student is permanently incapacitated. If you system supplies an ExitType_OtherCode of ESY (end of school year), then the Exit Code supplied with that must be 3505 (Exited).

Message	SIF_ExtendedElement DailyInstructionalMinutes is invalid.
Help Description	<p>The Daily Instructional Minutes indicates to the Wave the total number of minutes of instruction occurring for this particular day. Since the total number of instructional minutes can vary from day to day, this value represents the total minutes for a specific day. You are seeing this warning message for several possible reasons: 1. The number is not in the valid format or is too high. It must be a whole number, no decimals and non-negative from 0 to 720. 2. If the day is a day of instruction, it must be greater than 0. 3. If the day is NOT a day of instruction, it must be 0. You can see the value supplied by looking at the “view Sif xml” link. This validation looks not only at that number but also at the CalendarDateType_Code supplied. This code and what it represents can be found in the 2.x Wave Requirements Document, section 7.34.</p>

Message	The StudentDailyAttendance does not have an associated Attendance Code Info object
Help Description	The StudentDailyAttendance provides information related to a student’s individual attendance for a particular day. You are seeing this warning message because a link to Attendance Code information is missing. The AttendanceCodeInfo object informs the Wave regarding whether or not this instance of daily attendance is an absence or a present value and the amount of that absence or present (half day or full day). Without this link, absent or present cannot be determined. In your local Student Information System, make sure that all attendance information has been filled out correctly and work with your Student Information System vendor to be sure that the “AttendanceCodeInfo object” is being supplied to the Wave. You can supply the contents of the “View SIF XML” link to your vendor. It will show the value that links to the missing AttendanceCodeInfo object to them.

Element	StudentSchoolEnrollment/SIF_ExtendedElement “CalendarSummaryRefId”
---------	--

Rule	Must be valid.
Code List	
Type	Warning
Message	This StudentSchoolEnrollment object does not have an associated CalendarSummary object.
Help Description	The StudentSchoolEnrollment object provides the Wave system with information related to the Entry and Exit of a student. The CalendarSummary object provides the Wave system with information related to the start and end of school and links to CalendarDate information related to each individual day. These two pieces of data link together through an Identifier that is provided inside of each one of them. You are seeing this warning message because the identifier provided in your StudentSchoolEnrollment object does not link with any provided CalendarSummary object. Work with your Student Information System vendor to correct this problem. You can provide them with the data contained in the “View SIF XML” link. That will give them the “CalendarSummaryRefId” that does not have an associated CalendarSummary.

Element	TermInfo/MarkingTerm
Rule	Must Exist
Code List	
Type	Warning
Message	MarkingTerm was not provided.
Help Description	The TermInfo object provides information related to the various terms a school has for grades, schedules, and attendance. It provides information about the start and end dates of semesters, quarters, trimesters, etc. It also contains three indicators (MarkingTerm, SchedulingTerm, and AttendanceTerm) which define whether or not this Term is applicable to grades, schedules and/or attendance. All three are required to be indicated with either a “Yes” or a “No”. You are seeing this warning because the indicator “MarkingTerm” was not provided for this Term at all. There is no way to define whether it is a Marking (grades) Term or not. Verify that information related to Terms is set up correctly in your local Student Information System and/or work with your Student Information System vendor to ensure this element is being sent to the Wave.
