This project focuses on encouraging text and visual literacy skills, systems thinking, and cross-curricular connections, while helping students identify and reach for their goals to make a difference in their own lives and our world. There is a strong focus on bringing whole communities together and better understanding different cultures and bridging the gap between generations. Shidler is excited about this project and feels it would benefit our community outreach programs. The following data assisted in choosing the project. FSU research found that, “planful competence is a powerful predictor of a student’s plans and their adult achievement in schooling and work.” This competence is a combination of a belief in one’s self, expanded career awareness, scholastic aptitude, and plans about the timing and extent of future attainment.</p>
