

Using the Tulsa TLE Evaluation Model with TalentEd Perform Technology

Presenter: Nick DeBuyl, Director of Sales, Netchemia

Description:

As an Oklahoma school district using the Tulsa TLE teacher evaluation model, the next decision is determining which technology you will use to manage the model. TalentEd Perform teacher evaluation cloud software from Netchemia was selected by Tulsa Public Schools as the technology to manage their TLE evaluation model in their own district. This webinar is your opportunity to find out what makes TalentEd Perform the best option for Oklahoma school districts using the Tulsa evaluation model.

Unlike other technology options, the forms and processes from the Tulsa TLE Model are already configured in TalentEd Perform, so you will have the opportunity during this webinar to see how the model will look and how you will actually be managing the model online.

The software, which is easily accessible online by all users, offers numerous advantages over other technology options. Districts using TalentEd Perform will be able to:

- Use the identical online framework used by Tulsa Public Schools
- Manage the evaluations of all employees with this one system, including classified staff.
- Take advantage of powerful analytics and reporting tools
- Use iPads and mobile devices to complete evaluation steps

TalentEd Perform includes these and many more features and advantages, and is affordable for districts of every size.

Join Nick DeBuyl, Director of Sales for Netchemia, as he introduces you to Netchemia and the TalentEd K-12 specific cloud software platform, gives you a tour of TalentEd Perform, and answers any questions you have about the system. We look forward to having you there!
