

# OK Deaf/Blind Technical Assistance Project Charting the Life Conference

Charting the Life Conference is a framework developed to help individuals with disabilities and families at any age or state of life think about what they need to know, identify how to find or develop supports, and discover what it takes to live the lives they want to live. Individuals and families may focus on their current situation and stage of life but may also find it helpful to look ahead to start thinking about what they can do or learn now that will help build an inclusive productive life in the future. Participants will leave the workshop with tools to make appropriate plans for each child for the future.
