A. If school district's total area in square miles $\underline{26.107870}$ is greater than the state average area in square miles $\underline{137.36023}$, go to next step and compute areal density. If district has less than state average area in square miles $\underline{137.36023}$, go to paragraph " D " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM $\underline{107.95}$ divided by district's total area in square mile $\underline{26.107870}=$ District's Areal Density 4.13 .
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of $\underline{2.46}$, or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 10 - CARTER District: 1077 - DICKSON

A. If school district's total area in square miles 128.078368 is greater than the state average area in square miles $\underline{137.36023}$, go to next step and compute areal density. If district has less than state average area in square miles 137.36023 go to paragraph " D " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,291.07 divided by district's total area in square mile $128.078368=$ District's Areal Density 10.08 .
If school district's areal density is less than 2.46, calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

A. If school district's total area in square miles 345.773169 is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles $\underline{137.36023}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 73.58 divided by district's total area in square mile $345.773169=$ District's Areal Density 0.21 .

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

A. If school district's total area in square miles $\underline{265.362421}$ is greater than the state average area in square miles $\underline{137.36023}$, go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 237.12 divided by district's total area in square mile $265.362421=$ District's Areal Density 0.89 .
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 122.33 | + | 23 | $=$ | 145.33 | (Ca) |

A. If school district's total area in square miles 130.532126 is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles 137.36023 go to paragraph " D " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 342.78 divided by district's total area in square mile $130.532126=$ District's Areal Density 2.63.
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |

A. If school district's total area in square miles 350.719106 is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 93.11 divided by district's total area in square mile $350.719106=$ District's Areal Density 0.27 .

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation

A. If school district's total area in square miles 82.977425 is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 100.66 divided by district's total area in square mile $82.977425=$ District's Areal Density 1.21.

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation

A. If school district's total area in square miles 223.687848 is greater than the state average area in square miles $\underline{137.36023}$, go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 205.65 divided by district's total area in square mile $223.687848=$ District's Areal Density 0.92 .

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

A. If school district's total area in square miles 150.526339 is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles 137.36023 go to paragraph " D " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 204.46 divided by district's total area in square mile $150.526339=$ District's Areal Density 1.36 .

If school district's areal density is less than 2.46, calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$126.28=\frac{0.585999}{}+.85=\prod_{\text {EC-5 ADM }}^{1.435999} \times \frac{103.28}{}=\frac{148.31}{\text { EC-5 Cost Factor }}$

## County: 49 - MCINTOSH District: C003-RYAL

A. If school district's total area in square miles 18.055267 is greater than the state average area in square miles 137.36023 go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 58.47 divided by district's total area in square mile $18.055267=$ District's Areal Density 3.24 .
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 54 - OKFUSKEE District: 1026 - OKEMAH

A. If school district's total area in square miles 164.910903 is greater than the state average area in square miles $\underline{137.36023}$, go to next step and compute areal density. If district has less than state average area in square miles 137.36023 go to paragraph " D " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 688.77 divided by district's total area in square mile $164.910903=$ District's Areal Density 4.18 .
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | = | 0.00 |

Use these Grade Level Group amounts in the following formula:

$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-\text { OHP ADM }}=\frac{0.00}{9-\text { OHP Cost Factor }}$
4) Sum $1+2+3$ from above

Multiply District Cost Factor (Line 4 above) $\quad 0$ by lessor of the Area Factor (Line 5 above) $\underline{0}^{0}$ or $1.00=$ Isolation Factor 0
5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{688.77}=$ Isolation Weight $\underline{0.00}$

A. If school district's total area in square miles $\quad 23.621326$ is greater than the state average area in square miles $\underline{137.36023}$, go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 189.76 divided by district's total area in square mile $23.621326=$ District's Areal Density 8.03 .

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

A. If school district's total area in square miles 26.071296 is greater than the state average area in square miles $\underline{137.36023}$, go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph " D " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 220.47 divided by district's total area in square mile $26.071296=$ District's Areal Density 8.46 .

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation

## County: 61 - PITTSBURG District: 1017 - QUINTON

A. If school district's total area in square miles 151.566319 is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 383.40 divided by district's total area in square mile $151.566319=$ District's Areal Density 2.53 .
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 64 - PUSHMATAHA District: C015-NASHOBA

A. If school district's total area in square miles 170.678582 is greater than the state average area in square miles $\underline{137.36023, ~ g o ~ t o ~ n e x t ~ s t e p ~}$ and compute areal density. If district has less than state average area in square miles $\underline{137.36023}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 50.72 divided by district's total area in square mile $170.678582=$ District's Areal Density 0.30 .
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 35.50 | + | 23 | = | 58.50 | (Ca) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 69 - STEPHENS District: I042-BRAY-DOYLE

A. If school district's total area in square miles 235.831843 is greater than the state average area in square miles $\underline{137.36023, ~ g o ~ t o ~ n e x t ~ s t e p ~}$ and compute areal density. If district has less than state average area in square miles $\underline{137.36023}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 266.40 divided by district's total area in square mile $235.831843=$ District's Areal Density 1.13.

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$139.78=\frac{0.529403}{}=.85=1.379403 \times \frac{116.78}{}=\frac{161.09}{\text { EC-5 ADM }}$

## County: 75 - WASHITA District: IO01 - SENTINEL

A. If school district's total area in square miles 256.304157 is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles 137.36023 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 305.64 divided by district's total area in square mile $256.304157=$ District's Areal Density 1.19 .
If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation

6) 

Multiply District Cost Factor (Line 4 above) $\underline{0.73}$ by lessor of the Area Factor (Line 5 above) $\underline{1.02}$ or $1.00=$ Isolation Factor $\underline{0.73}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{176.53}$ = Isolation Weight $\underline{128.87}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad 128.87$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 77 - WOODWARD District: I005-FORT SUPPLY

A. If school district's total area in square miles $\quad 243.521947$ is greater than the state average area in square miles 137.36023 , go to next step and compute areal density. If district has less than state average area in square miles $\underline{137.36023}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 143.94 divided by district's total area in square mile $243.521947=$ District's Areal Density 0.59 .

If school district's areal density is less than 2.46 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.46 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$88.83=\frac{0.833052}{}=.85=1.683052 \times \frac{65.83}{} \times \frac{110.80}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$162.00=\frac{0.753086}{}=.85=\frac{1.603086}{} \times \frac{29.00}{6-8 \text { ADM }}=\frac{46.49}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{C c}$ " from above
$177.11=\frac{1.648693}{}=\frac{2.428693}{} \times \frac{49.11}{}=\frac{119.27}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

$=$| $\frac{276.56}{1.92}$ | divided by district's Raw ADM | 143.94 |
| :---: | :---: | :---: |

(District's Square Miles 243.521947 - $\underline{137.36023}$ ) divided by $\underline{\underline{137.36023}}=$ Area Factor $\underline{0.77}$
6) Multiply District Cost Factor (Line 4 above) 0.92 by lessor of the Area Factor (Line 5 above) $\underline{0.77}$ or $1.00=$ Isolation Factor $\underline{0.71}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM 143.94 = Isolation Weight 102.20
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 102.20
