A. If school district's total area in square miles $\underline{26.110064}$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles $\underline{137.32596}$ go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 85.20 divided by district's total area in square mile $26.110064=$ District's Areal Density 3.26
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

## County: 08 - CADDO District: I167-FORT COBB-BROXTON

A. If school district's total area in square miles 154.589015 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 301.03 divided by district's total area in square mile $154.589015=$ District's Areal Density 1.95 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

A. If school district's total area in square miles 184.953333 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,152.30 divided by district's total area in square mile $184.953333=$ District's Areal Density 6.23 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 44 - MAJOR District: 1004 - ALINE-CLEO

A. If school district's total area in square miles 193.979646 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph " $D$ " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 126.35 divided by district's total area in square mile $193.979646=$ District's Areal Density 0.65 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 68.86 | + | 23 | = | 91.86 | (Ca) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

A. If school district's total area in square miles $\quad 22.626011$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 375.68 divided by district's total area in square mile $22.626011=$ District's Areal Density 16.60 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$

A. If school district's total area in square miles $\quad 229.331643$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 918.14 divided by district's total area in square mile $229.331643=$ District's Areal Density 4.00 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

## County: 55 - OKLAHOMA District: 1088 - BETHANY

A. If school district's total area in square miles 0.713476 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,731.85 divided by district's total area in square mile $0.713476=$ District's Areal Density 2427.34 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " D " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

A. If school district's total area in square miles $\underline{65.273157}$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph " $D$ " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 251.29 divided by district's total area in square mile $\underline{65.273157}=$ District's Areal Density 3.85 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

## County: 66-ROGERS District: 1004-OOLOGAH-TALALA

A. If school district's total area in square miles 176.907762 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,731.83 divided by district's total area in square mile $176.907762=$ District's Areal Density 9.79 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 70 - TEXAS District: 1008 -GUYMON

A. If school district's total area in square miles 360.728961 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 2,935.02 divided by district's total area in square mile $360.728961=$ District's Areal Density 8.14 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
