## Statewide Report

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 01 - ADAIRDistrict: C019 - PEAVINE
A. If school district's total area in square miles $\underline{26.110064}$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles $\underline{137.32596}$ go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 78.84 divided by district's total area in square mile $26.110064=$ District's Areal Density 3.02 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by "드" from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{6-8 \mathrm{ADM}}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=.78=\quad 0.780000 \times \frac{0.00}{9-\text { OHP ADM }}=\frac{0.00}{9-\text { OHP Cost Factor }}$
4) Sum $1+2+3$ from above

5) (District's Square Miles
26.110064 -
137.32596)
divided
$\underline{137.32596}=$ Area Factor 0

6) Mulitply the Isolation Factor on line 6 times the Raw ADM $78.84=$ Isolation Weight $\underline{0.00}$
D. Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{13.42}$

# Oklahoma State Department of Education 

Small School and Isolation Weight
2022-2023

## Statewide Report

2023 1ST 9 WKS
$529-\frac{6.00000}{529}=\frac{0.80}{631.80} \times \frac{0.000000}{631.80}=\frac{0.00}{\begin{array}{c}\text { Same Year } \\ \text { Raw ADM }\end{array}}=\frac{\begin{array}{c}\text { Small School } \\ \text { District Weight }\end{array}}{}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 01 - ADAIRDistrict: C022 - MARYETTA

A. If school district's total area in square miles $\underline{22.209573}$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 631.80 divided by district's total area in square mile $\underline{22.209573}=$ District's Areal Density 28.45 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

| divided by district's Raw ADM | 631.80 |
| :---: | ---: |
| -1.00 = District Cost Factor | 0 |

6) Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{631.80}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\underline{0.00}$

## County: 02 - ALFALFADistrict: 1001 - BURLINGTON

A. If school district's total area in square miles $\quad 266.686471$ is greater than the state average area in square miles $\underline{137.32596}$ go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 134.70 divided by district's total area in square mile $266.686471=$ District's Areal Density 0.51 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$89.00=\frac{0.831461}{}=.85=1.681461 \times \frac{66.00}{}=\frac{110.98}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$165.00=\frac{0.739394}{}=.85=\frac{1.589394}{} \times \frac{32.00}{6-8 \text { ADM }}=\frac{56}{6-8 \text { Cost Factor }}$
3) 292 divided by "Cc" from above
$\underline{164.70}=\frac{1.772920}{}+.78=\frac{2.552920}{x} \frac{36.70}{}=\frac{93.69}{9-O H P \text { ADM }}$
4) 

Sum $1+2+3$ from above

(District's Square Miles $266.686471-\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0.94}$
Multiply District Cost Factor (Line 4 above) $\underline{0.90}$ by lessor of the Area Factor (Line 5 above) $\underline{0.94}$ or $1.00=$ Isolation Factor $\underline{0.85}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{134.70}=$ Isolation Weight 114.50
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 114.50

## Statewide Report

2023 1ST 9 WKS
$529-\frac{\text { Raw ADM }}{529}=\frac{0.545425}{240.47} \times \frac{0.109085}{240.47}=\frac{26.23}{\substack{\text { Same Year } \\ \text { Raw ADM }}}$

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 06 - BLAINEDistrict: 1080 - GEARY
A. If school district's total area in square miles $\quad 297.453978$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 240.47 divided by district's total area in square mile $297.453978=$ District's Areal Density 0.81.

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$136.33=\frac{0.542801}{}=.85=1.392801 \times \frac{113.33}{}=\frac{157.85}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$185.58=\frac{0.657398}{}=.85=\frac{1.507398}{} \times \frac{52.58}{=} \frac{79.26}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$202.56=\frac{1.441548}{2}+.78=\frac{2.221548}{x} \frac{74.56}{=} \frac{165.64}{9-O H P \text { ADM }}$

4
Sum $1+2+3$ from above

6)

Multiply District Cost Factor (Line 4 above) $\underline{0.67}$ by lessor of the Area Factor (Line 5 above) $\underline{1.17}$ or $1.00=$ Isolation Factor $\underline{0.67}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{240.47}$ = Isolation Weight $\underline{161.11}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{161.11}$

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 08 - CADDODistrict: 1011 - HYDRO-EAKLY

A. If school district's total area in square miles 188.137546 is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 485.29 divided by district's total area in square mile $188.137546=$ District's Areal Density 2.58 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{0.00}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.00000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

(District's Square Miles 188.137546 - $\underline{137.32596) ~ d i v i d e d ~ b y ~} \underline{137.32596}=$ Area Factor $\underline{0}$
Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{485.29}=$ Isolation Weight $\underline{0.00}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 08 - CADDODistrict: I167-FORT COBB-BROXTON

A. If school district's total area in square miles 154.589015 is greater than the state average area in square miles $\underline{137.32596}$ go to next step and compute areal density. If district has less than state average area in square miles $\underline{137.32596}$ go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 281.51 divided by district's total area in square mile $154.589015=$ District's Areal Density 1.82 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 139.76 | + | 23 | = | 162.76 | (Ca) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 64.35 | + | 133 | $=$ | 197.35 | (Cb) |
| Grades | PK3,9 -OHP | 77.40 | + | 128 | $=$ | 205.40 | (Cc) |
|  |  | 281.51 |  |  |  |  |  |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$162.76=\frac{0.454657}{}=.85=1.304657 \times \frac{139.76}{}=\frac{182.34}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$197.35=\frac{0.618191}{}=.85=\frac{1.468191}{} \times \frac{64.35}{6-8 \text { ADM }}=\frac{648}{6-8 \text { Cost Factor }}$
3) 292 divided by "Cc" from above
$205.40=\frac{1.421616}{}=\frac{2.201616}{x} \frac{77.40}{}=\frac{170.41}{9-\text { OHP ADM }}$
4) 

Sum $1+2+3$ from above

divided by district's Raw ADM
$-1.00=$ District Cost Factor

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 10 - CARTERDistrict: 1074 - FOX
A. If school district's total area in square miles 135.351215 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 172.23 divided by district's total area in square mile $135.351215=$ District's Areal Density 1.27 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{135.351215 ~-~} \underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor 0
Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{172.23}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad 23.23$

## Statewide Report

2023 1ST 9 WKS
$529-\frac{\text { Raw ADM }}{529}=\frac{0.588129}{217.88} \times \frac{0.117626}{217.88}=\frac{25.63}{\substack{\text { Same Year } \\ \text { Raw ADM }}}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 15 - COALDistrict: 1002 - TUPELO

A. If school district's total area in square miles $\quad 118.276836$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph " $D$ " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 217.88 divided by district's total area in square mile $118.276836=$ District's Areal Density 1.84 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{118.276836}-\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{217.88}=$ Isolation Weight $\underline{0.00}$
D.

## Statewide Report

2023 1ST 9 WKS

$529-\frac{\text { Raw ADM }}{529}=\frac{0.540454}{243.10} \times \frac{0.108091}{243.10}=\frac{26.28}{$|  Same Year  |
| :---: |
|  Raw ADM  |}

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 16 - COMANCHEDistrict: I132-CHATTANOOGA

A. If school district's total area in square miles $\quad 265.146911$ is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 243.10 divided by district's total area in square mile $265.146911=$ District's Areal Density 0.92 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 116.56 | + | 23 | = | 139.56 | (Ca) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 55.46 | + | 133 | $=$ | 188.46 | (Cb) |
| Grades | PK3,9 -OHP | 71.08 | + | 128 | $=$ | 199.08 | (Cc) |
|  |  | 243.10 |  |  |  |  |  |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$139.56=\frac{0.530238}{}=.85=1.380238 \times \frac{116.56}{}=\frac{160.88}{\text { EC-5 ADM }}$
2) 122 divided by "Cb" from above
$188.46=\frac{0.647352}{}=.85=\frac{1.497352}{} \times \frac{55.46}{6-8 \text { ADM }} \frac{83.04}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{C c}$ " from above
$\ldots+\frac{1.466747}{199.08}+.78=\frac{2.246747}{x} \frac{71.08}{=} \frac{159.70}{9-O H P \text { ADM }}$
4) 

Sum $1+2+3$ from above

Multiply District Cost Factor (Line 4 above) $\underline{0.66}$ by lessor of the Area Factor (Line 5 above) $\underline{0.93}$ or $1.00=$ Isolation Factor $\underline{0.61}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{243.10}$ = Isolation Weight $\underline{148.29}$
D.

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 18 - CRAIGDistrict: 1065 - VINITA

A. If school district's total area in square miles 172.561944 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,321.14 divided by district's total area in square mile $172.561944=$ District's Areal Density 7.66 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | = | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{0}=\frac{0.00}{9-\text { OHP ADM }}$
4) $\operatorname{Sum} 1+2+3$ from above

(District's Square Miles $\underline{172.561944 ~-~ 137.32596) ~ d i v i d e d ~ b y ~} \underline{\underline{137.32596}}=$ Area Factor $\underline{0}$
Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor 0
5) Mulitply the Isolation Factor on line 6 times the Raw ADM 1,321.14 = Isolation Weight 0.00
D. Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{0.00}$

2023 1ST 9 WKS
$529-\frac{10 \text { Raw ADM }}{529}=\frac{166.19}{0.685841} \times \frac{0.137168}{2} \quad \begin{gathered}166.19 \\ \begin{array}{c}\text { Same Year } \\ \text { Raw ADM }\end{array}\end{gathered}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 21 - DELAWAREDistrict: C006-CLEORA

A. If school district's total area in square miles 32.250294 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph " $D$ " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 166.19 divided by district's total area in square mile $32.250294=$ District's Areal Density 5.15 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by "Cb" from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

5) Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
6) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{166.19}=$ Isolation Weight $\underline{0.00}$
D.

A. If school district's total area in square miles 295.098716 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 300.16 divided by district's total area in square mile $295.098716=$ District's Areal Density 1.02 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 151.55 | + | 23 | = | 174.55 | (Ca) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 59.08 | + | 133 | $=$ | 192.08 | (Cb) |
| Grades | PK3,9 -OHP | 89.53 | + | 128 | = | 217.53 | (Cc) |
|  |  | 300.16 |  |  |  |  |  |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$174.55=\frac{0.423947}{}+.85=\int_{\text {EC-5 ADM }}^{1.273947} \times \frac{151.55}{}=\frac{193.07}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$192.08=\frac{0.635152}{}+.85=\frac{1.485152}{} \times \frac{59.08}{6-8 \text { ADM }}=\frac{87.74}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$217.53=\frac{1.342344}{}+.78=\quad \frac{2.122344}{} \times \frac{89.53}{9-\text { OHP ADM }}=\frac{190.01}{9-\text { OHP Cost Factor }}$
4) Sum $1+2+3$ from above

5) Multiply District Cost Factor (Line 4 above) $\underline{0.57}$ by lessor of the Area Factor (Line 5 above) $\underline{1.15}$ or $1.00=$ Isolation Factor $\underline{0.57}$
6) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{300.16}=$ Isolation Weight 171.09
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 171.09

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 26 - GRADYDistrict: I056-ALEX
A. If school district's total area in square miles 144.499002 is greater than the state average area in square miles $\underline{137.32596}$ go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 302.21 divided by district's total area in square mile $144.499002=$ District's Areal Density 2.09 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$164.34=\frac{0.450286}{}+.85=\frac{1.300286}{} \times \frac{141.34}{\text { EC-5 ADM }}=\frac{183.78}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$208.56=\frac{0.584964}{}+.85=\frac{1.434964}{} \times \frac{75.56}{6-8 \mathrm{ADM}}=\frac{108.43}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$213.31=\frac{1.368900}{}+.78=\quad \frac{2.148900}{} \times \frac{85.31}{9-\text { OHP ADM }}=\frac{183.32}{9-\text { OHP Cost Factor }}$
4) Sum $1+2+3$ from above

5) 

(District's Square Miles $\underline{144.499002 ~-~ 137.32596) ~ d i v i d e d ~ b y ~} \underline{\underline{137.32596}}=$ Area Factor $\underline{0.05}$
6) Multiply District Cost Factor (Line 4 above) $\underline{0.57}$ by lessor of the Area Factor (Line 5 above) $\underline{0.05}$ or $1.00=$ Isolation Factor $\underline{0.03}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{302.21 ~=~ I s o l a t i o n ~ W e i g h t ~} \underline{9.07}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{25.91}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 28 - GREERDistrict: 1001 - MANGUM

A. If school district's total area in square miles 393.294934 is greater than the state average area in square miles $\underline{137.32596}$ go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 640.77 divided by district's total area in square mile $393.294934=$ District's Areal Density 1.63 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " D " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$328.50=\frac{0.225266}{}+.85=\frac{305.50}{}=\frac{328.49}{\text { EC-5 ADM }}$
2) 122 divided by " Cb " from above
$286.93=\frac{0.425191}{}+.85=\int_{6}^{1.275191} \times \frac{153.93}{6-8 \text { ADM }}=\frac{196.29}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above

4) Sum $1+2+3$ from above

5) 

(District's Square Miles 393.294934 - 137.32596 ) divided by $\underline{\underline{137.32596}=\text { Area Factor } 1.86}$
6) Multiply District Cost Factor (Line 4 above) 0.31 by lessor of the Area Factor (Line 5 above) 1.86 or $1.00=$ Isolation Factor $\underline{0.31}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{640.77}=$ Isolation Weight 198.64
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 198.64

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 32 - HUGHESDistrict: 1001 - MOSS
A. If school district's total area in square miles 147.866819 is greater than the state average area in square miles $\underline{137.32596}$ go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 255.98 divided by district's total area in square mile $147.866819=$ District's Areal Density 1.73 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$140.10=\frac{0.528194}{}+.85=\frac{1.378194}{} \times \frac{117.10}{\text { EC-5 ADM }}=\frac{161.39}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$195.56=\frac{0.623849}{}+.85=\frac{1.473849}{} \times \frac{62.56}{6-8 \text { ADM }}=\frac{92.20}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$204.32=\frac{1.429131}{}+.78=\quad \frac{2.209131}{} \times \frac{76.32}{9-\text { OHP ADM }}=\frac{168.60}{9-\text { OHP Cost Factor }}$
4) Sum $1+2+3$ from abov

5) 

(District's Square Miles $147.866819-13732596$
rea Factor $\quad \underline{0.08}$
6) Multiply District Cost Factor (Line 4 above) $\underline{0.65}$ by lessor of the Area Factor (Line 5 above) $\underline{0.08}$ or $1.00=$ Isolation Factor $\underline{0.05}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 33 - JACKSONDistrict: 1040 - OLUSTEE-ELDORADO

A. If school district's total area in square miles $\quad 284.505898$ is greater than the state average area in square miles $\underline{137.32596}$ go to next step and compute areal density. If district has less than state average area in square miles $\underline{137.32596}$ go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 187.26 divided by district's total area in square mile $284.505898=$ District's Areal Density 0.66 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of $\underline{2.48}$, or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 95.10 | + | 23 | = | 118.10 | (Ca) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 50.92 | + | 133 | $=$ | 183.92 | (Cb) |
| Grades | PK3,9 -OHP | 41.24 | + | 128 | = | 169.24 | (Cc) |
|  |  | 187.26 |  |  |  |  |  |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$118.10=\frac{0.626588}{}+.85=\frac{1.476588}{} \times \frac{95.10}{\text { EC-5 ADM }}=\frac{140.42}{\text { EC-5 Cost Factor }}$
2) 122 divided by "Cb" from above
$183.92=\frac{0.663332}{}+.85=\int_{6}^{1.513332} \times \frac{50.92}{6-8 \text { ADM }}=\frac{77.06}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$\frac{169.24}{}=\frac{1.725360}{}+.78=\int_{9} \times \frac{2.505360}{91.24}=\frac{103.32}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

5) 
6) M

7) Mulitply the Isolation Factor on line 6 times the Raw ADM 187.26 = Isolation Weight 132.95
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 132.95

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 40 - LE FLOREDistrict: 1007 - POCOLA
A. If school district's total area in square miles 31.595397 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 738.93 divided by district's total area in square mile $31.595397=$ District's Areal Density 23.39 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

(District's Square Miles 31.595397 - $\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor 0
5) Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
6) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{738.93}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 0.00

$529-\frac{375.93}{529}=\frac{0.289357}{}=\frac{0.057871}{375.93} \times \frac{21.76}{\begin{array}{c}\text { Same Year } \\ \text { Raw ADM }\end{array}}=\frac{\begin{array}{c}\text { Small School } \\ \text { District Weight }\end{array}}{}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 40 - LE FLOREDistrict: I091-ARKOMA

A. If school district's total area in square miles 3.596582 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 375.93 divided by district's total area in square mile $3.596582=$ District's Areal Density 104.52 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{=}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \mathrm{ADM}}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-\text { OHP ADM }}=\frac{0.00}{9-\text { OHP Cost Factor }}$
4) Sum $1+2+3$ from above

5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{375.93}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{21.76}$

$529-\frac{763.47}{529}=\frac{0.000000}{}=\frac{0.000000}{763.47} \times \frac{0.00}{\substack{\text { Same Year } \\ \text { Raw ADM }}}=\frac{\begin{array}{c}\text { Small School } \\ \text { District Weight }\end{array}}{}$

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 46 - MAYESDistrict: 1016 - SALINA
A. If school district's total area in square miles $\quad 78.956224$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 763.47 divided by district's total area in square mile $78.956224=$ District's Areal Density 9.67 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

divided by district's Raw ADM

(District's Square Miles $78.956224-\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
5) Multiply District Cost Factor (Line 4 above) $\leq$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor 0

Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{763.47}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\underline{0.00}$

## Statewide Report

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 48 - MCCURTAINDistrict: C001 - FOREST GROVE

A. If school district's total area in square miles $\quad 44.215604$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph " $D$ " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 145.44 divided by district's total area in square mile $44.215604=$ District's Areal Density 3.29 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) 

Sum $1+2+3$ from above

5) (District's Square Miles 44.215604 137.32596) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$ Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{145.44}=$ Isolation Weight $\underline{0.00}$

## Statewide Report

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 48 - MCCURTAINDistrict: I039 - WRIGHT CITY

A. If school district's total area in square miles 165.874811 is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 472.97 divided by district's total area in square mile $165.874811=$ District's Areal Density 2.85 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by "Cb" from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

5) 

(District's Square Miles $\underline{165.874811 ~-~} \underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{472.97}=$ Isolation Weight $\underline{0.00}$
D.

$529-\frac{1,489.04}{529}=\frac{0.000000}{}=\frac{0.000000}{1,2} \times \frac{1,489.04}{\begin{array}{c}\text { Same Year } \\ \text { Raw ADM }\end{array}}=\frac{0.00}{\begin{array}{c}\text { Small School } \\ \text { District Weight }\end{array}}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 50 - MURRAYDistrict: 1001 - SULPHUR

A. If school district's total area in square miles 144.747017 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,489.04 divided by district's total area in square mile $144.747017=$ District's Areal Density 10.29 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\int^{0.850000} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-\text { OHP ADM }}=\frac{00}{9-\text { OHP Cost Factor }}$
4) $\operatorname{sum} 1+2+3$ from above

Multiply District Cost Factor (Line 4 above) $]_{\square}^{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor 0
5) Mulitply the Isolation Factor on line 6 times the Raw ADM 1,489.04 = Isolation Weight 0.00
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\underline{0.00}$

## County: 51 - MUSKOGEEDistrict: 1074 - WARNER

A. If school district's total area in square miles $\underline{84.170279}$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 806.35 divided by district's total area in square mile $84.170279=$ District's Areal Density 9.58 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{0.00}$
4) Sum $1+2+3$ from above

5) (District's Square Miles $8 \underline{84.170279}$ - $\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
6) 

7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{806.35}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{0.00}$

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 54 - OKFUSKEEDistrict: 1002 - MASON

A. If school district's total area in square miles 112.528247 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 255.43 divided by district's total area in square mile $112.528247=$ District's Areal Density 2.27 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " D " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-\text { OHP ADM }}=\frac{00}{9-\text { OHP Cost Factor }}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{112.528247}$ - $\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
Multiply District Cost Factor (Line 4 above) $]_{\square}^{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor 0
5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{255.43}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{26.42}$

2023 1ST 9 WKS

| 529 | Raw ADM |  |  | x | . 2 | 0.000000 | x | 712.44 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | - | 712.44 | 0.000000 |  |  |  |  |  |  |  |
|  |  | 529 |  |  |  |  |  | Same Yea |  | Small School |
|  |  |  |  |  |  |  |  | Raw ADM |  | District Weight |

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 55 - OKLAHOMADistrict: E028-JOHN W REX CHARTER ELEMENTARY

A. If school district's total area in square miles $\quad 0.000000$ is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 712.44 divided by district's total area in square mile $0.000000=$ District's Areal Density 0 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | $=$ | 0.00 | (Ca) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | $=$ | 0.00 | (Cb) |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 | (Cc) |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by "Cb" from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by " $\underline{C c}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{=} \frac{0.00}{9-\text { 9HP ADM }}$
4) Sum $1+2+3$ from above

Multiply District Cost Factor (Line 4 above) $\quad 0$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{712.44}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{0.00}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 55 - OKLAHOMADistrict: 1088 - BETHANY

A. If school district's total area in square miles 0.713476 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM $1,740.89$ divided by district's total area in square mile $0.713476=$ District's Areal Density 2440.01 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | = | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\mathrm{Cc}}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{0.00}$

divided by district's Raw ADM

(District's Square Miles $\underline{0.713476}$ - $\underline{137.32596}$ ) divided by $\underline{\underline{137.32596}}=$ Area Factor $\underline{0}$

Mulitply the Isolation Factor on line 6 times the Raw ADM $1,740.89$ = Isolation Weight $\underline{0.00}$
D. Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad 0.00$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 55 - OKLAHOMADistrict: Z006 - eSCHOOL VIRTUAL CHARTER ACAD

A. If school district's total area in square miles $\underline{0}$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 580.95 divided by district's total area in square mile $0=$ District's Areal Density 0 . If school district's areal density is less than $\underline{2.48}$, calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | = | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above

$$
0.00=\frac{0.000000}{}=.85=\frac{0.850000}{0.00}=\frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}
$$

2) 122 divided by "Cb" from above
$\frac{0.00}{}=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \mathrm{ADM}}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " Cc " from above

| 0.00 |
| :--- | $0.000000=.78=\frac{0.780000}{} \times \frac{0.00}{9-\text { OHP ADM }}=\frac{00}{9-\text { OHP Cost Factor }}$

4) Sum $1+2+3$ from above

$=$| 0.00 | divided by district's Raw ADM | 580.95 |
| :--- | :--- | :--- |
| 0.00 | $-1.00=$ District Cost Factor | 0 |

5) (District's Square Miles $\underline{0}$ - $\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
6) Multiply District Cost Factor (Line 4 above) $\quad 0$ by lessor of the Area Factor (Line 5 above) $\quad 0$ or $1.00=$ Isolation Factor 0
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{580.95}$ = Isolation Weight $\underline{0.00}$
D. Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad 0.00$

$529-\frac{209.53}{529}=\frac{0.603913}{}=\frac{0.120783}{20.2} \frac{209.53}{\begin{array}{c}\text { Same Year } \\ \text { Raw ADM }\end{array}}=\frac{25.31}{\substack{\text { Small School } \\ \text { District Weight }}}$

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 57 - OSAGEDistrict: 1011 - SHIDLER
A. If school district's total area in square miles 409.716063 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 209.53 divided by district's total area in square mile $409.716063=$ District's Areal Density 0.51 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$116.30=\frac{0.636285}{}=\frac{1.486285}{} \times \frac{93.30}{}=\frac{138.67}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$185.26=\frac{0.658534}{}=.85=\frac{1.508534}{} \times \frac{52.26}{6-8 \text { ADM }} \frac{78.84}{6-8 \text { Cost Factor }}$
3) 292 divided by "Cc" from above

| 191.97 |
| :--- |$+.78=\frac{1.521071}{}=\frac{2.301071}{63.97}=\frac{147.20}{9-O H P \text { ADM }}$

4
Sum $1+2+3$ from above

(District's Square Miles 409.716063 - $\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor 1.98
6) Multiply District Cost Factor (Line 4 above) $\underline{0.74}$ by lessor of the Area Factor (Line 5 above) 1.98 or $1.00=$ Isolation Factor $\underline{0.74}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{209.53}$ = Isolation Weight 155.05
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad 155.05$

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 58 - OTTAWADistrict: 1018 - COMMERCE
A. If school district's total area in square miles 56.952946 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 878.35 divided by district's total area in square mile $56.952946=$ District's Areal Density 15.42.
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{0.00}$
4) Sum $1+2+3$ from above

5) 

(District's Square Miles 56.952946 - 137.32596)
divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
Multiply District Cost Factor (Line 4 above) $\underline{0}^{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}^{0}$ or $1.00=$ Isolation Factor 0
Mulitply the Isolation Factor on line 6 times the Raw ADM $878.35=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{0.00}$

## Statewide Report

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 60 - PAYNEDistrict: 1056 - PERKINS-TRYON

A. If school district's total area in square miles 186.340336 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM $1,568.45$ divided by district's total area in square mile $186.340336=$ District's Areal Density 8.42 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | = | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\mathrm{Cc}}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-0.00}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{186.340336}$ - 137.32596) divided by $\underline{\underline{137.32596}}=$ Area Factor $\underline{0}$

5) Mulitply the Isolation Factor on line 6 times the Raw ADM $1,568.45=$ Isolation Weight 0.00
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad 0.00$

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 61 - PITTSBURGDistrict: 1002 - CANADIAN
A. If school district's total area in square miles 101.699413 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 439.70 divided by district's total area in square mile $101.699413=$ District's Areal Density 4.32 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=0_{\text {EC-5 ADM }}^{0.850000} \times \frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{0.00}$
4) Sum $1+2+3$ from above

5) 

Multiply District Cost Factor (Line 4 above) $]_{\square}^{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor 0
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{439.70 ~=~ I s o l a t i o n ~ W e i g h t ~} \underline{0.00}$

## Statewide Report

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 62 - PONTOTOCDistrict: 1001 - ALLEN

A. If school district's total area in square miles 157.732895 is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 444.48 divided by district's total area in square mile $157.732895=$ District's Areal Density 2.82 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by "Cb" from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

5) (District's Square Miles $157.732895-\underline{137.32596}$ )
divided by rea Factor $\underline{0}$

Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{444.48}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 14.20

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 63 - POTTAWATOMIEDistrict: 1001 - MCLOUD

A. If school district's total area in square miles $\quad 73.747031$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,662.93 divided by district's total area in square mile $73.747031=$ District's Areal Density 22.55 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | = | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\mathrm{Cc}}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-0.00}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{73.747031 ~-~} \underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
5) Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
6) Mulitply the Isolation Factor on line 6 times the Raw ADM $1,662.93=$ Isolation Weight 0.00
D.

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 65 - ROGER MILLSDistrict: 1006 - REYDON
A. If school district's total area in square miles $\quad 248.163255$ is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 123.49 divided by district's total area in square mile $248.163255=$ District's Areal Density 0.50 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$86.10=\frac{0.859466}{}=.85=1.709466 \times \frac{63.10}{}=\frac{107.87}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$158.00=\frac{0.772152}{}=.85=\frac{1.622152}{} \times \frac{25.00}{6-8 \text { ADM }} \frac{40.55}{6-8 \text { Cost Factor }}$
3) 292 divided by "Cc" from above
$163.39=\frac{1.787135}{}=\frac{2.567135}{} \times \frac{35.39}{}=\frac{90.85}{9-\text { OHP ADM }}$

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 66 - ROGERSDistrict: 1005 - INOLA
A. If school district's total area in square miles 101.279585 is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,324.50 divided by district's total area in square mile $101.279585=$ District's Areal Density 13.08 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$
4) 

Sum $1+2+3$ from above

| divided by district's Raw ADM | $1,324.50$ |
| :--- | ---: |
| -1.00 D District Cost Factor | 0 |

5) (District's Square Miles $101.279585-\underline{137.32596}$ )

## Statewide Report

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 68 - SEQUOYAHDistrict: 1001 - SALLISAW

A. If school district's total area in square miles $\quad 137.289638$ is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM $1,802.89$ divided by district's total area in square mile $137.289638=$ District's Areal Density 13.13 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4 - 5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | $=$ | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.00000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$0.00=\frac{0.000000}{}=.78=\frac{0.780000}{} \times \frac{0.00}{}=\frac{0.00}{9-\text { OHP ADM }}$

4
Sum $1+2+3$ from above

| divided by district's Raw ADM | $1,802.89$ |
| :--- | ---: |
| -1.00 District Cost Factor | 0 |

(District's Square Miles 137.289638 - $\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 70 - TEXASDistrict: 1015 - HARDESTY

A. If school district's total area in square miles 250.196780 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 67.38 divided by district's total area in square mile $250.196780=$ District's Areal Density 0.27 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph "D" at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$49.65=\frac{1.490433}{}+.85=\frac{2.340433}{} \times \frac{26.65}{\text { EC-5 ADM }}=\frac{62.37}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$153.08=\frac{0.796969}{}+.85=\frac{1.646969}{} \times \frac{20.08}{6-8 \text { ADM }}=\frac{33.07}{6-8 \text { Cost Factor }}$
3) 292 divided by " Cc " from above
$148.65=\frac{1.964346}{}+.78=\quad 2.744346 \times \frac{20.65}{}=\frac{56.67}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{250.196780 ~-~} \underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0.82}$
Multiply District Cost Factor (Line 4 above) 1.26 by lessor of the Area Factor (Line 5 above) $\underline{0.82}$ or $1.00=$ Isolation Factor 1.03
5) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{67.38}=$ Isolation Weight $\underline{69.40}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad \underline{69.40}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 72 - TULSADistrict: C015-KEYSTONE

A. If school district's total area in square miles $\quad 45.324110$ is greater than the state average area in square miles $\underline{137.32596}$ go to next step and compute areal density. If district has less than state average area in square miles $\mathbf{1 3 7 . 3 2 5 9 6}$, go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 288.73 divided by district's total area in square mile $\underline{45.324110}=$ District's Areal Density 6.37 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " D " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-\text { OHP ADM }}=\frac{00}{9-\text { OHP Cost Factor }}$
4) $\operatorname{sum} 1+2+3$ from above

| 288.73 |  |

2023 1ST 9 WKS

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 72 - TULSADistrict: G003 - DOVE SCHOOLS OF TULSA

A. If school district's total area in square miles $\quad 0$ is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM $1,237.56$ divided by district's total area in square mile $0=$ District's Areal Density 0

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{}=\frac{\text { EC-5 ADM }}{}$
2) 122 divided by " $\underline{C b}$ " from above
$0.00=\frac{0.000000}{}=\frac{0.850000}{} \times \frac{0.00}{=} \frac{0.00}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above

4) Sum $1+2+3$ from above

$=$| $\frac{0.00}{0.00}$ | divided by district's Raw ADM |
| :---: | :---: |
| $-1.00=$ District Cost Factor |  |

| $1,237.56$ |
| ---: |
| 0 |

5) (District's Square Miles $\underline{0}-\underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$
6) Multiply District Cost Factor (Line 4 above) $\underline{0}$ by lessor of the Area Factor (Line 5 above) $\underline{0}$ or $1.00=$ Isolation Factor $\underline{0}$
7) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{1,237.56}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\underline{0.00}$

## DISTRICT SPARSITY-ISOLATION FORMULA

County: 72 - TULSADistrict: 1008 - SPERRY
A. If school district's total area in square miles 57.008489 is greater than the state average area in square miles $\underline{137.32596}$, go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 1,077.59 divided by district's total area in square mile $57.008489=$ District's Areal Density 18.90 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

| Grades | PK4-5th | 0 | + | 23 | = | 0.00 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grades | 6th - 8th | 0 | + | 133 | = | 0.00 |
| Grades | PK3,9 -OHP | 0 | + | 128 | = | 0.00 |

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{\text { EC-5 Cost Factor }}{}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{0}=\frac{0.00}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{57.008489 ~-~} \underline{137.32596}$ ) divided by $\underline{137.32596}=$ Area Factor $\underline{0}$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 73 - WAGONERDistrict: I365-PORTER CONSOLIDATED

A. If school district's total area in square miles 119.023719 is greater than the state average area in square miles 137.32596 , go to next step and compute areal density. If district has less than state average area in square miles 137.32596 go to paragraph "D" at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 553.39 divided by district's total area in square mile $119.023719=$ District's Areal Density 4.65 .

If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$0.00=\frac{0.000000}{}+.85=\frac{0.850000}{} \times \frac{0.00}{\text { EC-5 ADM }}=\frac{0.00}{\text { EC-5 Cost Factor }}$
2) 122 divided by " Cb " from above
$0.00=\frac{0.000000}{}=.85=\frac{0.850000}{} \times \frac{0.00}{6-8 \text { ADM }}=\frac{0.00}{6-8 \text { Cost Factor }}$
3) 292 divided by " $\underline{\text { Cc" }}$ from above
$0.00=\frac{0.000000}{}=\frac{0.780000}{} \times \frac{0.00}{9-\text { OHP ADM }}=\frac{00}{9-\text { OHP Cost Factor }}$
4) $\operatorname{sum} 1+2+3$ from above

5) (District's Square Miles $\qquad$ 137.32596
divided by $\underline{137.32596}=$ Area Factor 0

6) Mulitply the Isolation Factor on line 6 times the Raw ADM $\underline{553.39}=$ Isolation Weight $\underline{0.00}$
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight $\quad 0.00$

## DISTRICT SPARSITY-ISOLATION FORMULA

## County: 76 - WOODSDistrict: I003 - WAYNOKA

A. If school district's total area in square miles 488.394377 is greater than the state average area in square miles 137.32596 go to next step and compute areal density. If district has less than state average area in square miles 137.32596 , go to paragraph " $D$ " at the end of the Weighted District Calculation.
B. Compute areal density: School District's Raw ADM 223.57 divided by district's total area in square mile $488.394377=$ District's Areal Density 0.46 .
If school district's areal density is less than 2.48 , calculate the District Sparsity-Isolation Formula as follows in the next step. If district has an areal density of 2.48 , or greater, proceed to Paragraph " $D$ " at the end of the Weighted District Calculation
C. Group the subtotals of the Raw ADM (unweighted) as follows:

Use these Grade Level Group amounts in the following formula:

1) 74 divided by "Ca" from above
$132.21=\frac{0.559716}{}=.85=\frac{1.409716}{} \times \frac{109.21}{}=\frac{153.96}{\text { EC-5 ADM }}$
2) 122 divided by " $\underline{C b}$ " from above
$181.41=\frac{0.672510}{}=.85=\frac{1.522510}{} \times \frac{48.41}{6} \frac{73.70}{6-8 \text { ADM }}$
3) 292 divided by "Cc" from above
$\overline{193.95}=\frac{1.505543}{}+.78=\frac{2.285543}{x} \frac{65.95}{9} \frac{150.73}{9-\text { OHP ADM }}$
4) Sum $1+2+3$ from above

(District's Square Miles $\underline{488.394377 ~-~} \underline{137.32596) ~ d i v i d e d ~ b y ~} \underline{137.32596}=$ Area Factor $\underline{2.56}$
5) Multiply District Cost Factor (Line 4 above) $\underline{0.69}$ by lessor of the Area Factor (Line 5 above) $\underline{\underline{2} .56}$ or $1.00=$ Isolation Factor $\underline{0.69}$
6) Mulitply the Isolation Factor on line 6 times the Raw ADM 223.57 = Isolation Weight 154.26
D.

Select the greater weight of the Small School District Weight or the Isolation Weight and use that for the Weighted District Weight 154.26
