OVERALL OBJECTIVE STATEMENTS

Document current evaluation data and write objective statements, (may include recent statewide and districtwide assessments) to demonstrate how the child's disability affects the child's involvement, functional performance, and progress in the general education curriculum and postsecondary education transition, as appropriate. For students of transition age, document transition assessment results as they relate to the postsecondary goal(s). For preschool children, describe how the disability affects the child's participation in age appropriate activities.

The date of the IEP meeting and the time frame in which the IEP is effective must be noted at the top of the document. IEPs must be reviewed at least annually. However, this does not limit the number of reviews and updates. The IEP is a living, fluid document than can be adjusted to best meet the student's needs based on a team decision.

One box will be marked to designate: Initial - first IEP for the student, Subsequent - an annual IEP, Interim - available in the circumstance that a student moves into a new district and the team needs time (maximum of 30 calendar days until it expires) to evaluate the IEP prior to accepting it or writing a new one, or Addendum - minor change to the IEP that does not change the ending date of the IEP

This section provides the student's basic information. Most of this automatically populates from the district's student information system. It is important in meetings to confirm that all information is current. date of the IEP

The purpose of the objective statement is to give a snap shot of the student and an overview of their individual needs. This information should provide a clear understanding for staff in the event that the student transfers to a new location.

The team must indicate whether or not the student will participate in the Oklahoma Alternate Assessment Program. In order for a student to be eligible for this, the team must complete *The Criteria Checklist for Assessing Students with Disabilities on Alternate Assessments*. All answer on this criteria checklist must be marked "yes."

Current assessments, a year old or less, should be included in each IEP to document the student's levels of performance, in order to determine areas of strengths and needs. These can include, but are not limited to, benchmark data, achievement tests, behavioral data, etc. The data from these assessments should be used to develop appropriate annual goals and objectives for the student

Annual goals are designed to meet the individual needs of the student. They should be aligned with the needs noted earlier in the IEP and the present levels. Goals should be individualized and represent what the team desires for the student to accomplish within the year that the IEP is effective.

Each goal documents what area of need the goal is aligned with (examples would include math problem solving, fine motor skills, transition, etc.), who is responsible for teaching and tracking the goal, if it will be worked on during extended school year (ESY), what the target score is for the particular goal (for example, 70% accuracy or 7 out of 10 trials), how progress of the goal will be measured, and how often progress will be shared with parents or guardians.

Revised: 9/9/2020

Page 6 of 13

A transition services plan must be in effect no later than the beginning of 9th grade or by the time the student turns 16, whichever comes first. Transition assessments should be completed annually to document progress and develop postsecondary, annual goals and transition services. The team should also indicate the student's strengths, preferences, interests, and specific transition needs (moneymangement, employment, self-determination, etc.) This plan helps prepare the student for life after high school.

The desired post-secondary/outcome completion goals should be individualized and document the student's plan fo rafter high school. All students with a transition services pla nshould have a goal for education/training (examples wouldinclude college, a trade school, on the job training, etc.) and an employment goal (examples would include the type of joba student wants after high school). It is appropriate t oaddress independent living and community participation goals when the student is participating in the alternate assessment and when results from assessments indicate student's needs in these areas. Independent living would bean individualized goal based on where the student plans to live after high school (for example, an apartment with roommates or live in a group home). Community participation would include how the student will be active within their community after high school (for example, organizations, volunteering, teams, etc.)

The IEP team must indicate whether a student plans onenrolling in the OK Promise program to help the teamdetermine which curriculum the student will participate in.OK Promise requires participation in College Prep/WorkReady. The IEP team will select which curriculum the student participates in.

INDIVIDUALIZED EDUCATION PROGRAM DESCRIPTION

SPECIAL EDUCATION - GUIDANCE BRIEF

The student's course of study, listing classes that the student needs to take and when, should be listed in this section to ensure that the student is on track for completing coursework towards their postsecondary goals. It may be appropriate to update this from year to year as the student's plans change and evolve.

Transition services and coordinated activities that are required to support the student in meeting their post secondary outcomes should be documented for each transition area. This section also notes who is responsible for this service or coordinated activity, which agency is responsible and when the team anticipates the completion of the service or activity. Accommodations necessary for supporting a student to accomplish the individualized services should be documented, as well Oklahoma only has a regular (standard) high date of the IEP

Oklahoma only has a regular (standard) high school diploma. A GED is not considered a regular high school diploma. Students enrolled in a GED program cannot also be enrolled in a public school and, therefore, are not eligible for special education and related services.

Information should be given to the student and parents about opportunities for vocational education and documented on the IEP. By the age of 16, the student should be referred to the vocational rehabilitation counselor with parent consent Vocational rehabilitation is a state service designed to assist students with disabilities in gaining and maintaining a job after high school. The student and parents should be given a copy of the referral and encouraged to apply for services.

The team must document whether the student will participate in regular PE or adaptive PE. If accommodations are needed to support the student in regular PE, this should be documented in the accommodations section of the IEP. If PE is not a requirement for the student's grade level, and the student does not select PE as an elective, check N/A.

The length of the student's school week must be listed here. If it is not the same length of day as nondisabled peers, then the team must explain why the student requires a shortened week and how they plan to work towards increasing the student's instructional week to be the same as nondisabled peers.

Documentation of LRE Placement Considerations

The Continuum of Placements for the least restrictive environment (LRE) includes regular classes full-time, special classes part-time or full-time, public/private separate day school facility, public/private residential facility, home instruction/hospital environment, correctional facility, or parentally placed in private schools.

Provide an explanation below of the extent, if any, to which the child will not participate with nondisabled students in the general education curriculum or age appropriate activities:

Describe continuum of placements considered and reasons determined not appropriate:

Classroom accommodations should be listed in this section. These accommodations should be determined by the team to support the student in the general education setting. These accommodations should be aligned with the student needs listed in the IEP. For example, if reading fluency is a need for the student, then the team may determine that tests read aloud in math, science and history are necessary to ensure that knowledge is being assessed, rather than the student's reading level.

Any state or district testing accommodations should be documented in this section. The classroom and state testing accommodations should correspond or be similar so that alignment is evident.

LRE is the "Least Restrictive Environment." The goal is to have the student in the general education classroom to the maximum extent possible. So, the IEP documents how much time they spend outside of the general education classroom

The continuum of placements ranges from fulltime in the general education setting to more restrictive environments. The IEP team must document where the student falls on this continuum and why the other placement options are not appropriate.

This contingency plan may be put into effect upon site or district building closure, or may be initiated by the IEP team, including the parent, in the event of health/medical reasons, or other reasons. (if other, please specify). The school district will provide a written notice to parents at the time, noting the specific dates the contingency plan will be in effect. The Contingency Plan may need to be modified under some circumstances as determined by the IEP team.	
Describe how services will be provided:	
Describe how progress will be monitored:	
Describe how communication will take place between the school and the parent(s):	
Describe any other considerations (including supplementary aids and supports, accommodations, assistive technology, behavioral interventions, etc.):	

Any additional supplementary aids, services, or supports needed for the student or personnel to help the student be successful, that are not otherwise listed in the IEP, should be listed here.

In this section, there should be an explanation for the student's need to spend time outside of the general education setting.

The IEP documents if the student attends their home school building/site, and if they are unable to attend their home school that they are in a placement as close as possible to the student's home. The percentage of time the student spends in the general education setting is also documented.

The purpose of the objective statement is to give a snap shot of the student and an overview of their individual needs. This information should provide a clear understanding for staff in the event that the student transfers to a new location.

In the event of a school or health emergency that result in a disruption of services, contingency plans can be written into the IEP to articulate the provision of special education and related services in light of those circumstances. This is an optional section of the IEP.

The IEP team always consists of at least the parent, special education teacher, general education teacher and the LEA representative, which may be the principal or other district or building administrator. Other service providers may be on the team, as well, depending on the student's needs. All attending team members must sign, date, and mark whether they agree or disagree. If a team member disagrees, they should be afforded the opportunity to provide their reasoning on an attached document. If the IEP meeting is held virtually, the signatures can be obtained virtually (i.e. a doc signing system, email confirmation of attendance, etc.) or document how the team participated.

If the parent does not attend, this must be noted in the IEP. Teams should document if the parent attended via phone conference, video call, home visit or other method. If the parent is unable to be reached after multiple communication attempts, any communication should be recorded in the contact log.

At each meeting, parents must be offered a new copy of their Notice of Procedural Safeguards, a parent survey, information about the Oklahoma School for the Deaf or Blind, if appropriate, and the OAAP brochure, if appropriate. There is also documentation of the parent's understanding of a contingency plan and when it goes into effect, if the IEP team chose to develop one. Translation need is also documented in this section.
