## Criteria Checklist for Assessing Students with Disabilities on Alternate Assessments

Name: Sandra Bullock Test

State Testing Number: 2342342343

The OAAP Portfolio Assessment is intended for a very small population of students with the most significant cognitive disabilities. Due to the severity of the cognitive disabilities of this population of students, alternate achievement of the content standards is required in daily instruction as well as statewide assessment and the performance expectations aligned with the statewide general assessment are not appropriate even with the accommodations. Assessment decisions are made on an annual basis by the IEP team and students must meet certain criteria to be eligible for an alternate assessment. Students who do not meet the eligibility criteria below SHOULD NOT take the alternate assessment.

PARTICIPATION CRITERIA CHECKLIST	Yes	No
Does the student have a significant intellectual disabilities AND significant adaptive behavior deficits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Does the student's IEP require alternate achievement standards in ALL content areas?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Does the IEP team feel extensive family/community support will be a lifelong requirement, regardless of modifications, accommodations or adaptations implemented in the student's program?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Does the student require intensive and extensive direct instruction in multiple settings to acquire, maintain, generalize, and demonstrate knowledge of skills?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
The decision to place the student on an alternate assessment is based on the student's disability and NOT on excessive absences, language, social, cultural, or economic differences, OR administration reasons such as the student is expected to perform poorly on the regular assessment, the student displays disruptive behaviors, or the student experiences emotional distress during testing.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

If the answer to ANY of the questions above is "NO", the student must participate in the regular assessment with or without accommodations. If ALL of the answers to the questions above are "YES", the student is eligible to participate in an alternate assessment.

OKLAHOMA STATE DEPARTMENT OF  
**EDUCATION**  
— CHAMPION EXCELLENCE —

# Question 1

---

**Does the student have significant intellectual disabilities AND significant adaptive behavior deficits?**

- IDEA Definition of Intellectual Disability: Intellectual disability means significantly sub-average general intellectual functioning, existing concurrently with deficits in adaptive behavior and manifested during the developmental period, that adversely affects a child's educational performance. [34 CFR §300.8(c)(6)]

# Question 1

---

- Intellectual disabilities are diagnosed by looking at two main things. These are:
  1. The ability of a person's brain to learn, think, solve problems, and make sense of the world (called IQ or intellectual functioning); and
  2. Whether the person has the skills he or she needs to live independently (called adaptive behavior or adaptive functioning).

# Question 1

## Intellectual Disability

---

- There is not an IQ score to define this term for alternate assessment purposes.
- However, when the USDE first determined that states would be allowed to utilize alternate assessments, they almost put an IQ score requirement in place. The number they determined appropriate was **3 standard deviations below** average!!!
- This assessment is not intended for students in the mild or moderate range of intellectual disability.

# Question 1

## Adaptive Behavior

---

- A limitation in adaptive skills must be assessed to be sure that it is a result of an adaptive behavior rather than the result of sensory, health or physical limitations.
- A comprehensive adaptive skills assessment is based on a body of evidence that reflects the child's social, linguistic, and cultural background.

# Question 1

## Adaptive Behavior

---

### Communication

- Interacting with others, using expressive and receptive language, writing, and listening, etc.

### Self-Care

- Eating, dressing, hygiene, toileting, grooming, etc.

### Home Living

- Caring for clothes, housekeeping, performing property maintenance, preparing food, cooking, budgeting, etc.

### Social

- Getting along with others, being aware of other people's feelings, forming relationships.

### Motor

- Fine motor, gross motor, sensory motor, etc.

### Practical Academics

- Literacy and numeracy, etc

### Community

- Accessing the community, transportation, shopping, safety, medical, etc.

# Question 2 - The IEP

---

**Does every section of the student's IEP reflect the severity of the students' disability?**

- Need for alternate achievement standards in ALL content areas?
- Present Levels of Performance (PLOP)
- Goals/objectives
- Accommodations/Modifications
- Historical assessment data
- Related/Supplementary Services

# Question 3 - Lifelong Requirement

Does the IEP team feel extensive family/community supports will be a lifelong requirement, regardless of modifications, accommodations or adaptations implemented in the student's program?

- Related to significant adaptive behavior deficits.
- Students will need various supports throughout their lives.

# Question 4 - Multiple Settings

---

Does the student require intensive and extensive direct instruction in multiple settings to acquire, maintain, generalize and demonstrate knowledge of skills?

- Relates to intellectual functioning.
- The severity of the student's disability requires the use of alternate achievement standards in daily instruction for all areas.

# **Question 5 - based on Disability**

The decision to place the student on an alternate assessment is based on the student's disability and NOT on excessive absences, language, social, cultural, or economic differences, OR administration reasons such as the student is expected to perform poorly on the regular assessment, the student displays disruptive behaviors, or the student experiences emotional distress during testing.
