**STATE SUPERINTENDENT OF PUBLIC INSTRUCTION
STATE OF OKLAHOMA**

Dear Parent/Guardian and Student:

Soon students will be participating in the Oklahoma Modified Alternate Assessment Program. These tests are designed to measure knowledge in Mathematics, Reading, Science, and History.

You will receive a report on your child's performance on the tests. This report will indicate your child's areas of strength as well as areas needing improvement.

This guide provides practice questions, objectives covered in the tests, and a list of test-taking tips. Discuss these materials with your child ahead of time to encourage test preparedness. During the test week, it is very important for students to get plenty of sleep, eat a good breakfast, and arrive at school on time.

If you have any questions about the Oklahoma Modified Alternate Assessment Program, please contact your local school or the State Department of Education.

Sincerely,
Your State Superintendent of
Public Instruction

The Oklahoma Modified Alternate Assessment Program

The Governor, state legislators, and other Oklahoma elected officials have committed themselves to ensuring that all Oklahoma students receive the opportunity to learn the skills required to succeed in school and in the workplace. To achieve this goal, schools must prepare every Oklahoma student for colleges, universities, and careers that require new and different skills.

Under the direction of the Legislature, Oklahoma teachers, parents, and community leaders met to agree upon the skills that students are expected to master by the end of each grade. The results of their efforts, Oklahoma Academic Standards, provide the basis for Oklahoma's core curriculum.

In addition, the Legislature established the criterion-referenced test component of the Oklahoma School Testing Program (OSTP) to measure students' progress in mastering the Oklahoma Academic Standards. Tests have been developed by national test publishers that specifically measure the Oklahoma Academic Standards at the end-of-instruction levels. Teachers from throughout Oklahoma have been involved in the review, revision, and approval of the questions that are included in the tests.

The Oklahoma Modified Alternate Assessment Program (OMAAP) is a criterion-referenced testing program which compares a student's performance with performance standards established by the State Board of Education. The performance standards are based upon recommendations from groups of Oklahoma educators who evaluated the test and recommended the performance standards for the different levels of performance for each test. The Oklahoma Performance Index, or OPI, is a scaled score earned by a student that places the student into one of the four performance levels (Advanced, Satisfactory, Limited Knowledge, Unsatisfactory).

The Modified assessments have been developed for students with disabilities who can make significant progress but may not reach grade-level achievement standards within the same time frame as other students, even after receiving the best-designed instructional interventions from highly qualified teachers. Beginning in 2013–2014, the Modified assessments are intended for those students who are repeat testers with a previous score in the same content area. The purpose of this test is to show proficiency in order to meet graduation requirements only.

The Modified assessments provide information about subject-level student academic performance in Reading, Mathematics, Science, and History in relation to the Oklahoma Academic Standards based on modified achievement standards. End-of-Instruction assessments are available in the following subjects:

English II

Algebra I

Biology I

U.S. History

These assessments provide informative data that educators can use to make instructional decisions, based on student performance in relation to the Oklahoma Academic Standards.

Achieving Classroom Excellence (ACE) End-of Instruction Legislation

The state statute reads as follows:

“Each student who completes the instruction for English II, English III, United States History, Biology I, Algebra I, Geometry, and Algebra II at the secondary level shall complete an end-of-instruction test, to measure for attainment in the appropriate state academic content standards in order to graduate from a public high school with a standard diploma.” All students shall take the tests prior to graduation, unless otherwise exempt by law.

“Beginning with students entering the ninth grade in the 2008–2009 school year, every student shall demonstrate mastery of the state academic content standards in the following subject areas in order to graduate from a public high school with a standard diploma: Algebra I, English II, and two of the following five: Algebra II, Biology I, English III, Geometry, and United States History.”

To demonstrate mastery, the student shall attain at least a satisfactory score on the end-of-instruction criteria. Students who do not attain at least a satisfactory score on any end-of-instruction test shall be provided remediation and the opportunity to retake until at least a proficient score is attained on the tests of Algebra I, English II, and two of the following five: Algebra II, Biology I, English III, Geometry, and United States History, or will be allowed to substitute approved alternate tests in order to meet this requirement.

Students who do not meet these requirements may graduate from a public high school with a standard diploma by demonstrating mastery of state academic content standards by alternative methods as approved by the State Board of Education.

Students who score ten percent (10%) above the cut scores approved by the State Board of Education for the ACT, SAT, ACT PLAN, or PSAT alternate tests shall be deemed to have satisfactorily demonstrated mastery of the state academic content standards in the subject areas for which alternative tests have been approved and shall be exempt from taking the EOI tests in the subject areas of Algebra II, English III, Geometry, or U.S. History.

Students who have a score that is equal to or above the cut scores approved by the State Board of Education for the Advanced Placement course exams, ACT Workkeys, College-Level Examination Program (CLEP), or International Baccalaureate (IB) alternate tests shall be deemed to have satisfactorily demonstrated mastery of the state academic content standards in the subject areas for which alternative tests have been approved and shall be exempt from taking the EOI tests in the subject areas of Algebra II, English III, Geometry, or U.S. History. The State Board of Education shall adopt rules providing for implementation of the use of these alternate tests.

Overview of the OMAAP Tests

OMAAP tests were built from previously administered items contained in the OCCT operational test forms.

Items from the OCCT were modified and reviewed by committees of educators to be used on the Modified assessments. The following table illustrates the modification rules that are used for each subject area.

Subject Area	Modification Rules and Guidelines
Universal	<ul style="list-style-type: none"> • Minimize the number of questions on the page (limit to 2 or 3). • Provide only three answer options instead of four. • Highlight the main points in the question or passage by underlining and using bold font. • Avoid questions that require students to select the better/best answer. • Be consistent in wording of directions across grades and subjects. • Minimize the use of pronouns and prepositional phrases. • Avoid the use of multiple-meaning words and words that can function as more than one part of speech. • Enlarge art when possible. • Simplify art when possible (i.e. remove unnecessary labels, use less gray scale, use thicker lines when outlining, etc.). • Box informational text in an item. • Bullet information when possible (e.g. bullet detailed information or processes). • Reduce reading load of stem, stimuli, and answer options when possible. • Revise answer options to address parallelism and minimize outliers.
English II	<ul style="list-style-type: none"> • Break passages into smaller portions. • Place the questions that pertain to the smaller portion underneath or on a page facing that section. • Use footnotes for grades 6–8 and English II. • Put items in order of appearance in the passage. • Delete extraneous information including irrelevant material and unnecessary words in items or graphics (e.g. remove “most likely”). • Delete one part of a compound answer choice when possible. • Change passive voice to active voice when appropriate. • Eliminate answer choices that give students the option of making no changes to the item. • Direct student attention to graphics. • Simplify visual complexity of graphics.
Writing Prompt/ English II	<ul style="list-style-type: none"> • Simplify the prompt. • Simplify the Writer’s Checklist. • Use a 3-point holistic writing rubric.

Subject Area	Modification Rules and Guidelines
Algebra I	<ul style="list-style-type: none"> • Unless required by standard, avoid items with negative and positive answer choices that use the same number. • Place any items with coordinate grids on one page. • Be consistent with qualifiers in the stem and answer choices. • Avoid questions that use “best” or “closest.” • Avoid complicated art. • List coordinate grids in answer options vertically with plenty of space between the answer options to make the grids more accessible to the visually impaired (however, avoid spanning item over two pages). • Simplify reading load, including vocabulary, when possible. • Eliminate stimuli sets. • Delete one part of a compound answer choice when possible. • Delete griddable items, negative items, and items that cannot be modified based on guidelines. • Delete extraneous information including irrelevant material and unnecessary words in items or graphics. • Simplify complex sentence structure and vocabulary in item and answer choices without eliminating math vocabulary. • Change passive voice to active voice when appropriate. • Add precise language to provide additional context for clarification. • Use consistent language within an item in order to focus student attention on what is being asked. • Revise text as necessary to maintain the authenticity and logic of the item due to modifications. • Use bullets to clearly organize complex items into smaller, meaningful parts. • Direct student attention to graphics. • Simplify visual complexity of graphics. • Provide new text and/or reorganize existing text within the question to explain or clarify the graphic. • Provide additional graphics to support text, emphasize ideas, and facilitate comprehension. • Reduce the number of variables and simplify digits in items when appropriate. • Limit the number of steps and/or operations in multi-step problems. • Provide appropriate formula and/or conversion near the item. • Provide explicit directions to explain a process such as measuring (as long as it does not impact reading load).

Subject Area	Modification Rules and Guidelines
<p>Biology I</p>	<ul style="list-style-type: none"> • Reduce the amount of reading. • Avoid complicated art. • Simplify tables and charts by removing irrelevant rows or columns. • Box formulas to make them stand out. • Make sure answer options align to content and process. • Simplify reading load, including vocabulary, when possible. • Eliminate stimuli sets. • Delete cluster items, negative items, and items that cannot be modified based on guidelines. • Delete extraneous information including irrelevant material and unnecessary words in items or graphics. • Simplify complex sentence structure and vocabulary in item and answer choices without eliminating science vocabulary. • Change passive voice to active voice when appropriate. • Change items from an open-ended statement to a direct question or vice versa, as necessary, for clarification. • Add precise language to provide additional context for clarification. • Use consistent language within an item in order to focus student attention on what is being asked. • Revise text as necessary to maintain the authenticity and logic of the item due to modifications. • Use bullets to clearly organize complex items into smaller, meaningful parts. • Direct student attention to graphics. • Simplify visual complexity of graphics. • Provide new text and/or reorganize existing text within the question to explain or clarify the graphic; science content must remain accurate. • Provide additional graphics to support text, emphasize ideas, and facilitate comprehension. • Reduce the number of variables and simplify digits in items when appropriate. • Limit the number of steps and/or operations in multi-step problems. • Provide the appropriate formula and/or conversion near the item. • For Biology I, avoid using items that reference x and y axis on a graph.

Test-Taking Tips

The following tips provide effective strategies for taking the Oklahoma Modified Alternate Assessment. Test-taking skills cannot replace studying based on the Oklahoma Academic Standards, which serve as the foundation for the tests.

General Test-Taking Tips:

- DO...** read this guide carefully and review the sample items.
- DO...** make sure you understand all test directions. If you are uncertain about any of the directions, raise your hand to ask questions before testing has started.
- DON'T...** wait until the last minute to study for the test. These tests cover a lot of material, and you cannot learn it all in a short amount of time.
- DON'T...** worry about the tests. Students who are calm and sure of themselves do better on tests.

Tips for the Multiple-Choice Tests:

- DO...** read each question and every answer choice carefully. Choose the best answer for each question.
- DO...** check your work if you finish your test early. Use the extra time to answer any questions that you skipped.
- DO...** read the reading selections for the English II test carefully.
- DO...** remember that if you cannot finish the test within the time allotted, you will be given additional time to complete the test.
- DO...** mark all your answers in the test book.
- DON'T...** allow any stray pencil marks to go inside of the question boxes from working problems or making notes in your test book.
- DON'T...** spend too much time on any one question. If a question takes too long to answer, skip it and answer the other questions. You can return to any skipped questions after you have finished all other questions.

The U.S. History Test

This multiple-choice test is administered in one section in a paper/pencil test booklet. Testing time is approximately 60 minutes with up to an additional 20 minutes for testing directions. The test is not strictly timed. Testing sessions for students who need more time can be extended. However, some studies have shown that more than one hour of additional time can contribute to a decrease in student scores. This additional time is available as an immediate extension of the testing session; it is not available as a separate session at another time.

Students who finish a test early should make sure their work is complete and are encouraged to check and verify their answers prior to closing their test books. Once a test has been completed, students will not be allowed to reopen their test books.

The following sections of this guide:

- list the Oklahoma Academic Standards for the Social Studies (2012 Revision) that are covered on the U.S. History End-of-Instruction test.
