SCHOOL SAFETY & SECURITY PROFESSIONAL MICRO-CREDENTIAL

What is an Oklahoma State Department of Education School Safety & Security Professional?

An OSDE SSS Professional is someone who has knowledge of policies, processes, and actions that help to improve school safety and security. They have evaluated, updated and worked with policies and procedures that are included in a highly effective school emergency operations plan. (per REMS) A SSS Professional has the understanding that schools need to be prepared and tested (exercises/drills) for an all-hazards approach to school safety and security.

Why should you earn your OSDE School Safety & Security Micro-Credential?

Earning your SSS MC gives you the knowledge to prepare you to be an asset to your school, school safety planning team, safe school committee and/or your administrative team. With a focus on being prepared, not being scared, SSS professionals have tools to assist their school communities with building and implementing high quality Emergency Operations Plans, enacting good policies and procedures, and performing drills and exercises that will be useful and beneficial to all involved.
