Approved for High School Transcripts by Oklahoma Department of Career and Technology Education

Senate Bill 497 – “Beginning with students who enter the 9th grade in 2008-2009 school year, school districts shall report the student’s performance levels of satisfactory and above on end of instruction tests and any business and industry-recognized endorsements attained on the high school transcript.”

The following business and industry-recognized endorsements were evaluated and recognized by the Southern Regional Educational Board (SREB) to be standardized, rigorous, independently graded, knowledge-based, and administered on a multi-state or international level. These endorsements have also been approved by the Oklahoma Department of Career and Technology Education to be added to high school transcripts for those students earning the endorsement. The school district will receive notification from the local technology center when a student has earned a business and industry-recognized endorsement on this list. The school district will then add the endorsement to the student’s high school transcript.
