Measure Up
Assessment news for elementary school teachers

Thank You!

Thank you to all schools participating in the NAEP 2012 assessment! The NAEP 2012 assessments began in October 2011 with the long-term trend assessment, a special NAEP assessment in reading and mathematics that is administered every 4 years to 9-, 13-, and 17-year-old students throughout the nation.

The existence of the two national assessment programs, long-term trend NAEP and main NAEP, makes it possible to
• measure student progress over time, and also
• develop new assessment instruments that reflect current educational content and assessment methodology as educational priorities change.

The NAEP long-term trend assessments were first administered in reading in 1971, and in mathematics in 1973.

The NAEP long-term trend assessment was developed to give information on the changes in the basic achievement of our nation’s youth. It has been used to monitor trend lines first established in 1969. Results have been reported for reading since 1971 and for mathematics since 1973.

The last long-term trend assessment for which results are available was administered during the 2007-2008 school year. The resulting trend data showed higher average scores in mathematics for 9- and 13-year-olds in 2008 than in any previous assessment year.

The 2011–2012 long-term trend assessment of 13-year-olds began on October 10 and ended on December 16, 2011. Students who are 9 years old were assessed from January 9 to March 16, 2012, and 17-year-olds are being assessed from March 19 to May 25, 2012. The results of these assessments will be available in 2013.

NAEP 2011 Results

Mathematics

A nationally representative sample of 209,000 fourth-graders participated in the 2011 NAEP mathematics assessment. Students responded to questions designed to measure what they know and can do across five mathematics content areas: number properties and operations; measurement; geometry; data analysis, statistics, and probability; and algebra.

Fourth graders scored higher in 2011 than in previous assessment years

At grade 4, the average mathematics score in 2011 was 1 point higher than in 2009, and 28 points higher than in 1990.

Grade 4 average math scale scores

*Significantly different (p < .05) from 2011.

Reading

A nationally representative sample of 213,100 fourth-graders participated in the 2011 NAEP reading assessment. Students responded to questions designed to measure their reading comprehension across two types of texts: literary and informational.

Students’ reading comprehension remains unchanged from 2009 at grade 4

At grade 4, the average reading score in 2011 was unchanged from 2009 but 4 points higher than in 1992 (first year).

Grade 4 average reading scale scores

*Significantly different (p < .05) from 2011.
NAEP 2011 Results (continued)

Students’ performance is reported as average scores on a 0–500 scale for each subject and as percentages of students at or above three achievement levels.

Basic denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade.

Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

Advanced represents superior performance.

What Is The Nation’s Report Card?

The Nation’s Report Card informs the public about the academic achievement of elementary and secondary students in the United States. Report cards communicate the findings of NAEP, the largest continuing and nationally representative measure of achievement in various subjects over time.

Since 1969, NAEP assessments have been conducted periodically in reading, mathematics, science, writing, U.S. history, civics, geography, and other subjects. By collecting and reporting information on student performance at the national, state, and local levels, NAEP is an integral part of our nation’s evaluation of the condition and progress of education. Only information related to academic achievement and relevant variables is collected. The privacy of individual students and their families is protected, and the identities of participating schools are not released.
