**Meal Components and Quantities**

Requirement: 409-Did all reviewed meals during the review period indicate that all of the requirements were offered and served to students?

Finding: It is difficult to determine quantities of certain components because of the way meals are being recorded. For example, when baked chicken is served, there is no record of how many pounds of chicken were prepared, nor was there any indication as to how many children the meal was prepared for. Therefore, it is not possible to determine whether or not adequate amounts of food is being prepared or served. However, after observation of meal service, the reviewer feels that adequate amounts of food are being prepared and offered, it is just not being accurately recorded.

Corrective Action Required: Submit to SA a week’s worth (5 days) of production records showing that meals are being accurately credited and recorded.

**Dietary Specifications and Nutrient Analysis**

Requirement: District must meet daily and weekly component requirements for 9-12 grade.

Findings: According to the production records for the review period, daily and weekly vegetable, red/orange vegetable, daily and weekly meat/meat alt, and daily and weekly grains requirements are not being met for 9-12 grade. However, after observation of meal service, the reviewer feels that adequate amounts of food are being prepared and offered, it is just not being accurately recorded. These errors are not repeat violations and the reviewers provided technical assistance at the time of review.

Corrective Action Required: Submit to SA a week’s worth (5 days) of production records showing that meals are being accurately credited and recorded.
