

A number of changes to the Oklahoma State Department of Education course codes for mathematics will go into effect for the 2017-2018 school year. These changes promote improved mathematics advising for all Oklahoma high school students. Revised course codes are provided below along with notes in an effort to reduce confusion around, and duplication within, course codes. Decisions about additions, changes, deletions, and combinations are informed by the following four factors:

Factor 1 - Alignment to Current Standards

Factor 2 - Alignment to Best Practices Regarding Remediation and Support Structures

Factor 3 - Alignment to Advanced Mathematics Learning Opportunities

Factor 4 - Alignment to Best Practices Promoting Post-Secondary Readiness

To communicate the changes, the following table provides a summary of the current course codes in the three categories (College Prep, Non-College Prep, and Electives).
