

# WRITING/CONSTRUCTED REPONSE ANCHOR PAPER EXEMPLARS GRADE 8 ARGUMENT

#### Writing Topic:

People have different viewpoints about whether animals, including endangered animals, should live in the wild or in man-made environments. Write an argument whether any animal should be kept in a controlled environment, such as zoos or nature parks. Be sure to state a claim and address an opposing claim using evidence presented in both passages.

Before you begin planning and writing your response, read the two passages:

1. "The Impact of Animal Protection"

2. "Do Animals Lose in Zoos?"

## **The Impact of Animal Protection**

- 1 Throughout history, human activities have changed or destroyed the habitats that animals need to survive. One of these activities has been the construction of roads and buildings in areas that were once wild. Building in these areas has destroyed animal homes, food, or water supplies. People have also cut down trees for lumber, which has destroyed the homes of animals living in those trees. Likewise people have hunted animals for their meat, fur, or other body parts. In addition, pollution caused by humans has affected some of the places that animals live.
- 2 Due to animals habitats being disturbed as well as other reasons, scientists and researchers track animals in the wild to see if their numbers are changing. When an animal's numbers decrease until they are at risk of disappearing completely, they may be classified as threatened or endangered. When there are no more of the species left in the world, they are classified as extinct. As some animals become extinct, other animals are affected. Because some human activities can have a negative impact on animals, many people believe that animals must be protected.
- 3 One way that people have tried to protect animals from extinction is to establish nature parks and sanctuaries. People cannot build or hunt in those areas, and rangers are there to watch over the animals. The public is often allowed to enjoy these animals by driving through the reserves and viewing the animals in a wide-open atmosphere.
- 4 Many nature parks have programs that keep animals in protected places. By putting them in controlled environments, the animals can live safely,

and their numbers can increase through supervised breeding programs. However, in these environments animals many times cannot choose their own mates as they do when living in the wild. Issues with this type of forced breeding have been seen in zoos when a male and female fail to have offspring.

- 5 In man-made animal habitats, animals are fed on a regular schedule, receive medical care, and are protected from predators and hunters. The goal is to properly care for animals that may not survive in the wild. After time though, some of these animals may be released back into their wild habitats. However, if not handled properly, this release can be dangerous for animals since they will now be forced to hunt for prey and use their instincts and survival skills once again.
- 6 Keeping animals protected has proven to be beneficial and increase the populations of endangered animals. These programs have helped bring several animals—black-footed ferrets, California condors, red wolves, golden lion tamarins, and others—back from near extinction over the last 30 years.
- 7 Despite saving animals that were close to extinction, protecting animals in a controlled environment is not always the best plan. When animals are in these environments, they are isolated from other animals, their ability to hunt and their natural diet is limited, and the space they have to roam is decreased. In the wild, animals share their territory with other species, and the idea of survival of the fittest is very apparent. When animals are taken out of the wild, the innate instincts they have to survive are suppressed and, in some cases, completely gone.
- 8 By allowing endangered animals to live in a protected environment, animals are able to reproduce and be saved from extinction, but it is not a catchall to resolve all of the issues when protecting animals. For those that are released into the wild, the hope is that they can relearn how to find food and take care of themselves. Even though nature parks are trying to mimic the wild, they are not able to do that completely.

# **Do Animals Lose in Zoos?**

- 1 Zoos have been around for centuries. In the past, zoos were a simple collection of animals in cages. Many animals in early zoos were diseased and treated poorly. Zoos today are very different. Modern zoos pride themselves as centers for scientific study and research. They focus on animal welfare and are on a mission to educate people about animals and protect the animals in the wild.
- 2 Animals in zoos live longer than animals in the wild. They are well fed, protected from predators, and treated by veterinarians. Seeing majestic animals in a controlled environment creates a sense of amazement and wonder. A study published by the National Science Foundation actually shows that visiting a zoo changes a person's attitude toward animals. If people are not able to see the animals, they will not be inspired to protect them.
- 3 However, critics of the modern zoo compare the zoo to a prison. Animals need room to climb, fly, swim, roam, or run. They need room to live a healthy life. When animals are confined in small spaces, it has a negative impact on their behavior and health. Polar bears have been observed swimming in circles. Parrots have groomed themselves until they have no feathers left. Big cats have been seen endlessly pacing. When animals are not behaving as they normally would in the wild, visitors are not observing natural behaviors.
- 4 Zoos spend millions of dollars to create bigger and better animal enclosures in order to improve the conditions for the animals. Zoos also help to raise millions of dollars to support conservation projects in Africa and Asia. Some of the money is used to create sanctuaries to help protect animals in their natural environment. Although animals should be protected in these nature preserves, some countries do not cooperate. They do not enforce penalties for illegal hunting of protected animals.
- 5 Nevertheless, not all zoos are created the same. Many organizations, like PETA, oppose zoos because the "homes" made for zoo animals meet only their basic needs. Even with man-made areas to fly, swim, climb, and explore, animals are still restricted in their behavior. These groups feel that zoos and even wildlife parks show cruelty against animals that would thrive so much better if they were allowed to live in the wild and be free.
- 6 More often than not, zoos cater to what people want to see. That usually means something large, charismatic, or cute is selected to live in a zoo and be on display. Another attraction to zoos is to see baby animals. In order to get more business, some zoos initiate a breeding program to have babies be on display more frequently. This leads to a surplus of animals at

the zoo. Zoo enclosures are made for a certain amount of animals, so this overpopulation, even with babies, makes for crowding and a less than idea living situation for the animals.

- Supporters of keeping animals out of zoos and nature parks, feel it is better for wild animals to live in a natural environment so they can hunt and eat a natural, varied diet. It has been shown that in the wild, animals interact with other species of animals which promotes natural behaviors. Wild animals roam over long distances in search of a mate, food, or water. Also many animals are a part of a social group or live in communities. Living within a community allows them to interact normally and create a social order where a dominant animal can emerge. Living in a zoo or protected environment can restrict all of these innate or inborn behaviors.
- 8 It is true that many of today's zoos are more than just a place to see animals. They have programs to protect endangered species from extinction. Visitors to zoos, or those planning a visit, should also realize that some situations they see are not the best environment for the animals they are planning to see. There are benefits to having zoos, but there are still negative impacts to animal's lives. Perhaps the best way to help animals is to protect them in zoos for a short time and release them back into nature while they still are wild animals.

# WRITING/CONSTRUCTED REPONSE RUBRIC

#### **Oklahoma Academic Standards-Grade 8 Writing Rubric**

Each piece of student writing is given five analytic scores that focus on specific writing skills. These ratings range from 4 (the highest score) to 1 (the lowest score). Taken together, these scores provide a profile of the specific strengths and weaknesses of a student's writing. The following are the actual scoring rubrics used to assign the five analytic scores.

\*OAS objectives are annotated for each trait. Where no specific objective is listed (i.e., 8.3.W), the whole strand is intended.

Score	Ideas and Development—30%
4	<ul> <li>The content is well suited for the audience, task/purpose, and mode (8.3.W)</li> <li>The focus is consistent and maintained (8.2.W.1)</li> <li>Ideas are fully developed and elaborated using details, examples, reasons, or evidence (8.3.W.1-4)</li> <li>The writing expresses a consistent perspective throughout the composition (8.2.W.4)</li> <li>For Argument: at least one counterclaim is evident (8.3.W.3)</li> </ul>
3	<ul> <li>The content is adequate for the audience, task/purpose, and mode</li> <li>The focus is evident but may lack clarity</li> <li>Ideas are developed using some details, examples, reasons, and/or evidence</li> <li>The writing sustains the point of view throughout most of the composition</li> </ul>
2	<ul> <li>The content is inconsistent with the audience, task/purpose, and mode</li> <li>The focus may be unclear or leave the reader with questions and making inferences</li> <li>Ideas are minimally developed with few details</li> <li>May simply be a list of ideas</li> <li>The writing has difficulty expressing or maintaining a perspective</li> </ul>
1	<ul> <li>The content is irrelevant to the audience, task/purpose, and mode</li> <li>The focus may be confusing or missing</li> <li>Ideas lack development or may be repetitive</li> <li>The writing lacks perspective</li> </ul>

Score	Organization, Unity, and Coherence–25%
4	<ul> <li>Introduction engages the reader (8.3.W)</li> <li>Sustained and coherent focus (8.2.W.1)</li> <li>Logical and appropriate sequencing balanced with smooth, effective transitions to signal differing relationships among ideas (8.5.W.2)</li> <li>Order and structure are strong and move the reader through the text (8.2.W.3)</li> <li>Conclusion follows logically from the information presented and supports the body of writing (8.3.W, 8.3.W.4)</li> </ul>
3	<ul> <li>Evident introduction</li> <li>Adequate focus; stays on topic with little digression</li> <li>Adequate sequencing using limited but effective transitions</li> <li>Order and structure are present</li> <li>Conclusion is appropriate</li> </ul>
2	<ul> <li>May lack clear organizational structure</li> <li>Weak evidence of unity</li> <li>Little or limited sequencing and/or transitions</li> <li>Details may be randomly placed</li> <li>Conclusion may be inappropriate or ineffective</li> </ul>
1	<ul> <li>Lacks logical direction</li> <li>No evidence of organizational structure</li> </ul>

Score	Word Choice—15%			
4	<ul> <li>Appropriate word choice that conveys the correct meaning and appeals to the audience in an interesting, precise, and natural way (8.4.W.1-2)</li> <li>The writing may be characterized by, but not limited to (8.4.W.1-2), <ul> <li>Lively verbs</li> <li>Vivid nouns</li> <li>Imaginative adjectives</li> <li>Figurative language</li> <li>Dialogue</li> </ul> </li> <li>No vague, overused, repetitive language is used (a lot, greatly, very, really) (8.4.W.1-2)</li> <li>Effective words that evoke strong images such as descriptive language (8.4.W.2)</li> <li>Communicates by using academic and/or domain-appropriate words (8.4.W.1)</li> </ul>			
3	<ul> <li>Words generally convey the intended message</li> <li>The writing includes a variety of words that are appropriate but do not necessarily energize the writing</li> <li>The writing may be characterized by <ul> <li>Some use of lively verbs, vivid nouns and imaginative adjectives</li> <li>Attempts at figurative language</li> <li>Few vague, overused, and repetitive words</li> </ul> </li> </ul>			
2	<ul> <li>Word choice lacks precision and variety or may be inappropriate to the audience and purpose</li> <li>May be ineffective, simplistic, and/or vague</li> <li>Relies on overused or vague language (a lot, great, very, really)</li> <li>Few attempts at figurative language and/or dialogue</li> </ul>			
1	<ul> <li>Word choice is unimaginative and colorless with images that are unclear or absent</li> <li>Word choice indicates an extremely limited or inaccurate vocabulary</li> <li>No attempts at figurative language</li> <li>General, vague words that fail to communicate meaning</li> <li>Text may be too short to demonstrate variety</li> </ul>			

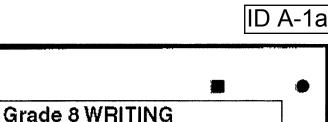

Score	Sentences and Paragraphs-15%
4	<ul> <li>Writing clearly demonstrates appropriate sentence structure (8.5.W.2)</li> <li>Sentences are appropriately constructed and structured with few or no run-on or fragment errors (8.5.W.2)</li> <li>Writing has a rich variety of sentence structure, types, and lengths (8.2.W.4, 8.5.W.2)</li> <li>Ideas are organized into paragraphs that blend into larger text (8.2.W.1,3-4)</li> <li>Writing shows evidence of appropriate paragraphing (8.2.W.1,3)</li> </ul>
3	<ul> <li>Writing adequately demonstrates appropriate sentence structure</li> <li>Writing may contain a small number of run-on or fragment errors that do not interfere with fluency</li> <li>Writing has adequate variety of sentence structure</li> <li>Ideas are organized into paragraphs</li> </ul>
2	<ul> <li>Writing demonstrates lack of control in sentence structure</li> <li>Writing contains errors such as run-ons and fragments that interfere with fluency</li> <li>Writing has limited variety of sentence structure</li> <li>Writing may show little or no attempt at paragraphing</li> </ul>
1	<ul> <li>Writing demonstrates inappropriate sentence structure</li> <li>Writing contains many errors in structure (run-ons, fragments)</li> <li>Writing has no variety in structure</li> <li>Writing displays no attempt at paragraphing</li> <li>Text may be too short to demonstrate use of sentences or paragraphs</li> </ul>

Score	Grammar, Usage, and Mechanics-15%			
4	<ul> <li>The writing demonstrates appropriate use of correct (8.5.W)</li> <li>Spelling         <ul> <li>Punctuation</li> <li>Capitalization</li> <li>Grammar</li> <li>Usage (e.g., correct usage of homonyms, correct usage of subjects and indirect objects, correct use of pronouns)</li> <li>Errors are minor and do not affect readability</li> </ul> </li> </ul>			
3	<ul> <li>The writing demonstrates adequate use of correct         <ul> <li>Spelling</li> <li>Punctuation</li> <li>Capitalization</li> <li>Grammar</li> <li>Usage</li> <li>Errors are noticeable but do not significantly affect readability</li> </ul> </li> </ul>			
2	<ul> <li>The writing demonstrates limited use of correct</li> <li>Spelling         <ul> <li>Punctuation</li> <li>Capitalization</li> <li>Grammar</li> <li>Usage</li> <li>Errors are distracting and may interfere with readability</li> </ul> </li> </ul>			
1	<ul> <li>The writing demonstrates minimal use of correct</li> <li>Spelling</li> <li>Punctuation</li> <li>Capitalization</li> <li>Grammar</li> <li>Usage</li> <li>Errors are numerous and severely impede readability</li> </ul>			

#### **Composite Score**

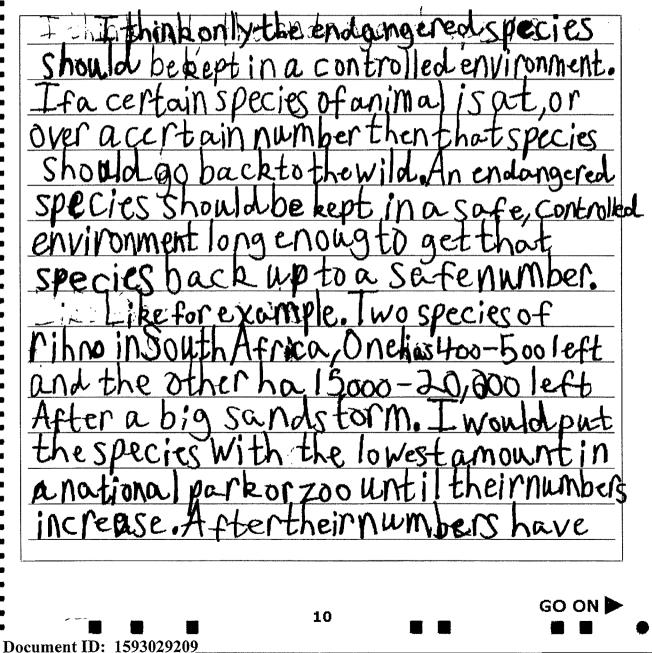

A student's composite score on the Writing section of the ELA assessment, in part, is derived by assigning various weights to the five analytic traits. The averaged analytic score for each category is multiplied by the appropriate weight (percentage) and summed.

In my opinion, I think animats Shuld be kept in the wild. The way are put into 2003 or nature parks their life could come crashing down. People who love animats wouldn't want to see. Humite formate commats in this kind of state, would they? Putting animals in 2005 or nature parks, is like forcing up themans to be in a world where we have. no control OV S DOUGY anything. I thank animats should live in the wild. I have many reasons for this opinion. One animato would be able to have a regular diet of different types. Two, they or natural have more space to roam around instead would

of being in a contained space where they

## Grade 8 WRITING

place to place in the wild, and they Man't do that in a 200. That might make some animals feel uncertian about where they are. IF the animals get to go roam then they feel more wild, but they clon't get to in zoos, Unlike the wild areas.

Secondly, the cages can be small to some animals like lions and tigers or bears. IF you have been to a 200, you can see that the land geapes are very and some what small, so that can callse crowding, espicially IF a female reproduces. Then there will be even less room. Having a small cage can be hard on animals. It can make them bored, or they will start pacing around, looking for something to do. The animals can get Frustrated and get angry very easily. That would not be a good thing for visitors

Should animals live in zoos or man-made environments? I think yes, they can get better health care, they can reproduce if close to becoming endangered, and they are also protected from preditors. Bood health is a key thing to have for any living thing. At Zoo's animals can get better Health care than they can get out in the wild. Sometimes animals are sent to places like zoo's just for health care and when the animal is strong enough they are sent back to their natural habital. This information Was found in the articles of "The Impact of Animal Protection" and "Do Animals Lose In 200's?"

#### ID Score Point 3

The content is largely appropriate for audience and purpose.

The writer addresses the prompt with a partially developed argument using claim (s) and counterclaims (s) , text-based evidence, and reasoning.

The writer attempts to paraphrase and cite evidence.

Writer sustains a perspective through most of the argument. First paragraph lays out the argument that in a man-made environment the animals can receive better health care, reproduce to prevent extinction, and be protected from predators. The body of the paper builds on these three ideas paraphrasing evidence from the texts.

Counterclaims in the final paragraph. "Zoos may not be all the right choice for animals. Zoos and nature parks are very limited on the amount of space that's given to the animals. People say that they have seen big cats pace around their enclosures, and that polar bears are seen swimming in circles."

tore you ever thought that keeping animalis in zoos is actually beneficial to them in many ways? that is true because animals are threatned in the wilderness and are exposed to some unhealthy living conditions. However, some people say otherwise because they think animals are not given the same type of freedom as they are in the wild. hat might be true in some cases but the reason why they should be kept in zoos or nature parks for outweighs the cause than why they shall t. Animals should be kept in zoos or nature parks because, they are being treated with love and care, also they are prochected from all hurt, harm, and danger, and also it's increasing the population of endangered species.

in order to improve the conditions for the animals Animals lifes were also effected in the wild from pollution caused by humans, with animals living in zoos they are proctected from that happening. 2005 are increasing the population of

endangered animals. That is because, their able to reproduce more. According to the passage animals that are in controlled environments, their numbers can increase and prevent extinction. Animals that have been near extinction have been saved due to being properly cared in zoos Although some might think the zoo is just a place to see animals, the zoos also have programs to proctect endangered animals from extinction.

As you can see, although many people think animals should be kept in the wild for their own benefits, the reason why they shouldn't live in the wild far outweighs why they should. Zoos and nature parks are providing beneficial needs to the animals that can't be provided in the wilderness.

People have different viewpoints about whether animals, including endangered animals, should live in the wild or in man-made environments. Write an argument whether any animal should be kept in a controlled environment, such as zoos or nature parks. Be sure to state a claim and address an opposing claim using evidence presented in both passages.

Endangered animals should live in 2005 or nature parks. But if the animals are not endangered then they should live in the wild where they belong. Endangered animals need to be in Zoos or nature parke because it can help them not come exstinted. It would be better if animals that are not endangered stay in the wild because they can hunt and provide for them selfs. It would also be bad to keep endangered animals because if you release them back into the wild they would not know how to provide or care for them selfs. If the environment is bad it will affect the animab behavior. So big animate need to be in big places so they can roam and run that way they can feel more at home. Small animals need small but not to small places to be that way the can do what they wanna do and still feel at home. The aninab behavior can tell you things about the animal and what it needs. If a big animal is acting weird as in going in circles or something it is telling

Write an argument whether any animal should be kept in a controlled environment, such as zoos or nature parks. Be sure to state a claim and address an opposing claim using evidence presented in both passages.

there are many pros and cons for animals living in man made environments and in the wild. One of the pros for animals living in was made environments is people can't hunt or build in them, like they can in the wild. Animals have a better chance of surviving when proper land hunt them, or when they carit build things where they are living. A pro for animals living in the wild is they all more natural and at home. than they do is 2000/manmade environments. Animals need to live in Chyiroments that are natural to them. Another pro for animals living in man-made environments or in 2005 is the animals get watched by the rangers. When the rangers watch over the animals they make sure nothing happens to them. Another pro for animals living in the wild is that they have a more healthy and Varied diet. When an animal has a healthy diet it tends to live longer. GO ON 10

Document ID: 1594351559

OUC A-6b

Grade 8 WRITING 121 Mat P P- Hally ONEY . There are alot of cons for animals in the wild and in Zoos or man made environments. Where there are buildings and roads now used to be nothing but jungle. Because of all the buildings and roads it has created pollution, and the pollution is killing the animals. Major Con for animals living in man-made environments is they Can't choose their own breeding mode, unlike in the wild. In manmade environments many animals have failed to produce off spring belause they court choose their as mate Allong with humans building roads and buildings they are Cestraying animals homes. When they put down trees for lumber they are destroying homes of the animals that live there. When animals are led on a require schedule they tend to get used to that. So when they go back to the world they might not be able to survive because they have to relearn to hunt and use there skills. In Conclusion I'm neutral on them being in the wild or in man-marche environments because in the wild they act natural, but also might dic, but in man-made environments they don't act natural and probably Will survive. So based off of the information I got out of the two passages if I had to choose one I would choose Man-made environments belowing I would rather animals alt unatural than dic. GO ON 11

People have different viewpoints about whether animals, including endangered animals, should live in the wild or in man-made environments. Write an argument whether any animal should be kept in a controlled environment, such as zoos or nature parks. Be sure to state a claim and address an opposing claim using evidence presented in both passages.

How much would you enjoy it is some strange person came and took you away and stuck you behind a glass stall while people stared at you? That example was known as a 200. Animals from the wild are being put in danger while at 2005, They are forced to do things that they normally wouldn't do. Animals need to stay in their natural habitat and not get shatched away, First of all, many humans might not have any idea the the killing manyared animals, This is a ginormous problem In Africa, Sonate Commune dorth enfonce punishment if someone kills or harms a protected animal. This could be costly and devastating because you never know : IF that animal was the last of its kind, GO ON

Also, Many animals are being forced to do simple tasks like eat or mate. Many species like the tigers, get tired of doing this and the start to pace non-stop around their cage. This isn't the only creature that does this; birds and polar bears act oddly also. When you take a trip to the zoo next time temember you aren't observing their natural behavior.

Most importantly, when animals are placed in a fake" habital for an extended amout of time they lose many habits. Their behavior changes when they are released into the wild and their behavior shifts. The animals will now have to relearn everything they were naturally given or taught. It is extremely dangerous for them to be released, but how could we avoid it?

When a species is put into an artifical habitat it loses tvenything. Eventhough, they are protocled from predators, they still need room to roam, run, and Ply! There is never though space to be free and explore,

love you ever thought that keeping animals in zoos is actually beneficial to them in many ways? hat is true because animals are threatned in the wilderness and are exposed to some unhealthy living conditions. However, some people say otherwise because they think animals are not given the some type of freedom as they are in the wild. hat might be true in some cases but the reason why they should be kept in zoos or nature parks far outweighs the cause than why they shall t. Animals should be kept in zoos or nature parks because, they are being treated with love and care, also they are prochected from all hurt, harm, and danger, and also it's increasing the population of endangered species. ## Grade 8 WRITING

#### Writing Topic:

Some people think that zoos aren't always the best thing for some animals. Some think that letting animals live in the wild would be better than locking them up in a zou. In my oppinion, zous are good for animals too. Zoos can sometimes have their differences. Zoos are also a great place to put a lot of wild animals. Yeah it might be hard at first, and maybe a little dangerous for the people catching them. At least we know they're not starving in a 200. Animals that are in 2005 (or anything else, like a saffarci) get fed daily. They don't have to hunt for prey. Animals always get treated well at zoos. I like 2003 because you get to see GO ON 10 Document ID: 159303157

SP A-9b Grade 8 WRITING 163 MEN PERMIT a lot of animals that you don't get to see in an everyday life. If there wasn't zoos, a lot of people wouldn't get to see the Kinds of animals that they have there. Yeah, not all animals get to roam free, but at reast they get treated well. Animals in the wildlife, however, do get to roam free. They get all the room they want to do whatever they like. Living in the wild doesn't always have a good advantage to what they get to do. They still have to hunt for their food, unlike animals that are in the 200. Living in the wild could make a lot of the animals become extinct faster. Some animals in the wild are very harmful, but yet a lot of them do have a brautiful background. When animals in the wild get sick, they don't have anyone to heal them like they would at a zou. They both have their advantages and disadvantages. We all have our own GO ON 11

## Grade 8 WRITING

#### Writing Topic:

People have different viewpoints about whether animals, including endangered animals, should live in the wild or in man-made environments. Write an argument whether any animal should be kept in a controlled environment, such as zoos or nature parks. Be sure to state a claim and address an opposing claim using evidence presented in both passages.
